

## THE DIAGRAM.

The accompanying diagram is intended to show the movement of gold and silver and Government issues since June, 1878.

The act authorizing "the coinage of the standard silver dollar and to restore its legal-tender character" became a law February 28, 1878. It provided for the purchase by the Treasury of silver bullion at the market price thereof, not less than \$2,000,000 worth per month nor more than \$4,000,000 worth per month, to be coined monthly as fast as so purchased into dollars of the weight of  $412\frac{1}{2}$  grains troy of standard silver. Any holder of the coin could deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than \$10, and receive therefor certificates of not less than \$10 each, corresponding with the denominations of the United States notes, these certificates to be receivable for customs, taxes, and all public dues, and when so received may be reissued.

The act of August 4, 1886, authorized and required the Secretary of the Treasury to issue silver certificates in denominations of \$1, \$2, and \$5, which were to be receivable, redeemable, and payable in like manner and for like purposes as was provided in the law of 1878.

By the law of July 14, 1890, the Secretary of the Treasury was directed to purchase silver bullion to the aggregate amount of 4,500,000 ounces or so much thereof as may be offered in each month at the market price, and to issue in payment of such purchases of silver bullion Treasury notes of the United States, these notes to be redeemable on demand in coin, and when so redeemed may be reissued, to be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued. Such notes, when held by any national banking association, may be counted as a part of its lawful reserve. The coinage of silver dollars to be each month limited to 2,000,000 ounces of silver bullion a month until the first day of July, 1891; after that time as much silver bullion to be coined as should be necessary to provide for the redemption of the Treasury notes provided for in this act.

November 1, 1893, an act became a law discontinuing the purchases of silver bullion under the law of 1890.

In the diagram the purchases, coinage, and circulation under the law of 1878 are shown in the light-colored section. The sections of a pink color show the experience under the laws of 1890 and 1893.

## REPORT OF THE COMPTROLLER OF THE CURRENCY—Continued.

|                                                                                                                                                                                                                                                                                                                                                                                                                                          | Page. |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| No. 51.—Statement exhibiting a classification of loans made by the national banks in the central reserve cities (New York, Chicago, and St. Louis) and other reserve cities, in groups, together with country banks, on approximate dates for the past five years.....                                                                                                                                                                   | 457   |
| No. 52.—Statement showing the classification of the loans by national banks in New York City for the last nine years.....                                                                                                                                                                                                                                                                                                                | 459   |
| No. 53.—Classification of the loans and discounts of the national banks in the reserve cities and in the States and Territories on October 2, 1894.....                                                                                                                                                                                                                                                                                  | 459   |
| No. 54.—Table, by States, Territories, and reserve cities, exhibiting the amount of each kind of coin and coin certificate held by the national banks on October 4, 1888; September 30, 1889; October 2, 1890; September 25, 1891; September 30, 1892; October 3, 1893, and October 2, 1894.....                                                                                                                                         | 461   |
| No. 55.—Statement exhibiting, by States, Territories, and reserve cities, the amount of coin and coin certificates held by the national banks on October 2, 1890; September 25, 1891; September 30, 1892; October 3, 1893, and October 2, 1894.....                                                                                                                                                                                      | 471   |
| No. 56.—Table exhibiting the deposits and reserve of national banks on or about October 1 of each year, from 1874 to 1894, in each central reserve city, in all other reserve cities, in the States and Territories, and a similar statement with respect to all national banks.....                                                                                                                                                     | 473   |
| No. 57.—Lawful money reserve of the national banks, as shown by their reports of condition at the close of business on October 2, 1894.....                                                                                                                                                                                                                                                                                              | 477   |
| No. 58.—Statement showing amount of deposits held by national banks, amount of lawful money reserve required, and ratio of same; also amount, ratio, and classification of reserve actually held on December 19, 1893, February 28, May 4, July 18, and October 2, 1894.....                                                                                                                                                             | 478   |
| No. 59.—Liabilities of the national banks, and the reserve required and held on three dates in the years 1889, 1890, 1891, 1892, 1893, and 1894.....                                                                                                                                                                                                                                                                                     | 479   |
| No. 60.—State of the lawful money reserve of the national banks, as shown by the reports from October 4, 1888, to October 2, 1894.....                                                                                                                                                                                                                                                                                                   | 482   |
| No. 61.—Table showing, by geographical divisions, the reserve cities and central reserve cities, the number of banks in operation at every date on which reports of condition have been made, from March 10, 1885, to October 2, 1894, inclusive, together with the amount of reserve required and the amount held at each of those dates, and the classification of the reserve held, showing amounts and percentages in each case..... | 484   |
| No. 62.—Average weekly deposits, circulation, and reserve of the national banks of New York City, as reported to the New York Clearing House, for the months given, in the years 1888, 1889, 1890, 1891, 1892, 1893, and 1894.....                                                                                                                                                                                                       | 494   |
| No. 63.—Table showing the movement of the reserve of the national banks in New York City during October for the last sixteen years.....                                                                                                                                                                                                                                                                                                  | 495   |
| No. 64.—Abstract of reports of earnings and dividends of national banks in the United States.....                                                                                                                                                                                                                                                                                                                                        | 496   |
| No. 65.—Omitted.                                                                                                                                                                                                                                                                                                                                                                                                                         |       |

## REPORT OF THE COMPTROLLER OF THE CURRENCY—Continued.

|                                                                                                                                                                                                                                                                                                                                                                                                           | Page. |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| No. 66.—Table, by States and reserve cities, showing ratios to capital, and to capital and surplus, of the earnings and dividends of national banks from March 1, 1890, to September 1, 1894.....                                                                                                                                                                                                         | 505   |
| No. 67.—Earnings and dividends of the national banks, arranged by geographical divisions, for semiannual periods from September, 1885, to September, 1894.....                                                                                                                                                                                                                                            | 506   |
| No. 68.—Number of national banks, their capital, surplus, dividends, net earnings, and ratios, yearly, 1870 to 1894.....                                                                                                                                                                                                                                                                                  | 508   |
| No. 69.—National banks which have gone into voluntary liquidation under the provisions of sections 5220 and 5221 of the Revised Statutes of the United States, with the dates of liquidation, the amount of their capital, circulation issued, retired, and outstanding October 31, 1894.....                                                                                                             | 509   |
| No. 70.—National banks in liquidation under section 7, act July 12, 1882, with date of expiration of charter, circulation issued, retired, and outstanding, succeeded by associations with the same or different title, October 31, 1894.....                                                                                                                                                             | 522   |
| No. 71.—National banks which have gone into voluntary liquidation under the provisions of sections 5220 and 5221 of the Revised Statutes of the United States, for the purpose of organizing new associations with the same or different title, with date of liquidation, amount of capital, circulation issued, retired, and outstanding on October 31, 1894.....                                        | 523   |
| No. 72.—National banks in liquidation under section 7, act of July 12, 1882, with date of expiration of charter, circulation issued, retired, and outstanding October 31, 1894.....                                                                                                                                                                                                                       | 525   |
| No. 73.—National banks which have been placed in the hands of receivers, together with capital and surplus at date of organization and at date of failure, cause of failure, dividends paid while solvent, circulation issued, lawful money deposited with the Treasurer to redeem circulation, the amount redeemed, and the amount outstanding October 31, 1894.....                                     | 526   |
| No. 74.—Insolvent national banks, dates of organization, appointment of receiver and closing, since the organization of the national banking system, with amounts of nominal and additional assets, amounts collected from all sources, loans paid and other disbursements, losses on assets, expenses of receivership, claims proved, dividends paid, and remaining assets returned to stockholders..... | 538   |
| No. 75.—Statement showing the national banks which failed during the year ended October 31, 1894, with capital, surplus, and liabilities, obtained from last report of condition.....                                                                                                                                                                                                                     | 554   |
| No. 76.—Statement showing receiverships in an inactive condition.....                                                                                                                                                                                                                                                                                                                                     | 555   |
| No. 77.—Statement giving the title of the eight national banks the affairs of which were closed during the year ended October 31, 1894, with date of appointment of receiver, total dividends on principal of claims, and proportion of interest paid.....                                                                                                                                                | 555   |
| No. 78.—Dividends, one hundred and twenty in number, paid to the creditors of insolvent national banks during the past year, with the total dividends in each case up to November 1, 1894.....                                                                                                                                                                                                            | 556   |
| No. 79.—Comparative statement for two years of the transactions of the New York Clearing House, showing aggregate amount of clearings, aggregate balances, and the kinds and amounts of money passing in settlement of these balances.....                                                                                                                                                                | 559   |

## REPORT OF THE COMPTROLLER OF THE CURRENCY—Continued.

## OPERATIONS OF THE TREASURY.

The report of the Treasurer of the United States\* contains the usual statistical information relating to the operations and condition of the Treasury. Including, together with the general balance, the balances of the postal revenues, of disbursing officers' funds, and of the various other deposit accounts, the total liabilities of the Treasury were \$776,-041,808 on June 30, 1893, and \$804,854,753.31 on June 30, 1894. These liabilities were fully covered by the sums of money and securities in the several offices of the Treasury and Mint, together with other authorized items of credit. After setting aside the unavailable amounts, chief of which are the deposits made with the States under the law of 1836, the net available assets were \$746,538,655.58 at the former date and \$775,-310,559.50 at the latter. Of these sums, \$584,593,920 and \$616,155,820, respectively, were on deposit for the payment of outstanding gold certificates, silver certificates, currency certificates, and Treasury notes, leaving \$161,944,735.58 in 1893 and \$159,154,739.50 in 1894 available for the general uses of the Treasury.

Several forms of stating the liabilities and resources of the Treasury having been employed at different periods, the Treasurer has recast the published monthly reports of condition in the form which has for some time been followed in the statement of the public debt, and for convenience of reference has presented the results in a series of tables. These afford a complete view of the condition of the Treasury at intervals of month since June, 1878.

These tables, together with others accompanying the report, exhibit the fluctuations in the gold reserve of the Treasury, and furnish full information concerning the conditions which have rendered it necessary to resort to unusual measures for the maintenance of that fund. Amongst these conditions are the diminishing resources of the Treasury and the increasing demands for gold in redemption of United States notes and Treasury notes, both for export and for domestic use.

\* See Appendix, page 3.

The amount of new issues of paper put into circulation during the year was never exceeded except once, in 1892, and the amount of worn and mutilated pieces redeemed was exceeded but once, in 1893. In consequence, the total paper circulation of the country reached, by the end of May, 1894, the highest point it had ever attained, standing then at \$1,175,054,480. A slight contraction since that time has been the result chiefly of the gradual redemption and retirement of gold certificates, the issue of which was suspended, in compliance with law, when the gold reserve fell below \$100,000,000.

#### COINS AND COINAGE—PRECIOUS METALS.

The Director of the Mint reports\* the operations of the mints and assay offices during the year, in detail, together with statistics of all the foreign countries, relative to the monetary condition, coinage, and production of each.

The value of the gold deposited at the mints and assay offices of the United States during the year was \$140,942,545.48; original deposits, \$71,909,513.31; redeposits, \$69,033,032.17. Of the amount of the original deposits, \$38,696,951.40 was of domestic production, \$28,000,525.00 foreign bullion and coin, \$3,118,421.45 old material, and \$2,093,615.46 worn and uncurrent United States coin. The deposits and purchases of silver during the year were 22,746,661.32 fine ounces, the dollar coinage value of the same being \$29,409,824.68; original deposits, \$28,697,030.80; redeposits, \$712,793.87. Of the original deposits, \$19,777,700.38 was of domestic production, \$1,832,889.99 foreign bullion and coin, \$6,481,403.98 worn and uncurrent United States coin, and \$605,036.46 old material.

The purchases of silver bullion under the act of July 14, 1890, during the year were 11,917,658.78 fine ounces, costing \$8,715,521.32, an average cost of \$0.7313 per fine ounce. The total amount of silver bullion purchased under this act from August 13, 1890, to November 1, 1893, the date of the repeal of the purchasing clause, was 168,674,682.53 fine ounces, costing \$155,931,002.25, the average price per fine ounce being \$0.9244.

The number of silver dollars coined during the year from bullion purchased under this act was 758, consuming 586.27 fine ounces, costing \$530.99. The seigniorage on this coinage was \$227.01.

The total coinage of silver dollars, under the act of July 14, 1890, to July 1, 1894, was 36,087,943, consuming 27,911,768.41 fine ounces, costing \$29,110,647.24. The total seigniorage on this coinage was \$6,977,295.76, and the balance of silver bullion purchased under the act and on hand at the mints on July 1, 1894, was 140,699,343.74 fine ounces, costing \$126,757,819.37.

Since the repeal of the purchasing clause of this act, silver contained in gold deposits, bar charges and fractions, to the amount of 82,989.71

\* See Appendix, page 142.

## XXXII REPORT OF THE SECRETARY OF THE TREASURY.

fine ounces, costing \$53,095.84, of the coining value in subsidiary coin of \$114,725.70, was purchased under the provisions of section 3526 of the Revised Statutes of the United States.

The total coinage during the year consisted of 62,485,220 pieces, valued as follows:

|                        |                   |
|------------------------|-------------------|
| Gold.....              | \$99 474, 912. 50 |
| Silver dollars.....    | 758. 00           |
| Subsidiary silver..... | 6, 024, 140. 30   |
| Minor coins.....       | 716, 919. 26      |
| Total.....             | 106, 216, 730. 06 |

The highest London price of bar silver during the year was reached on September 12, 1893, 34½d., equal to \$0.7645 per ounce, fine; while the lowest price was recorded in March, 1894, 27d., equal to \$0.5918 per ounce, fine, showing a fluctuation of \$0.1727.

*Earnings and expenditures.*

During the year the amount expended for the support of the Mint service aggregated \$1,068,612.19, as against \$1,344,005.07 for the fiscal year 1893. The total earnings of the mints and assay offices during the year were \$870,672.71, while the expenditures were \$1,278,723.06.

*Imports and exports.*

The net gold exports for the fiscal year were \$4,172,665, as against \$86,897,275 for the previous fiscal year.

The net silver exports for the fiscal year were \$31,041,359, as against \$7,653,813 for the fiscal year 1893.

*Coinage of standard silver dollars.*

Since the passage of the act of February 28, 1878, standard silver dollars have been coined at the mints of the United States to the amount of \$421,776,408, of which \$378,166,793 were coined from the bullion purchased under that act; \$38,531,143 from bullion purchased under the act of July 14, 1890, and \$5,078,472 under the act directing the coinage of trade-dollar bullion.

*Gold and silver used in the industrial arts.*

The value of the gold and silver used in the industrial arts in the United States during the last calendar year, based upon the best information obtainable, was, approximately, gold, \$12,523,523; silver, \$9,534,277. Of the gold \$8,354,482 and of the silver \$6,570,737 were new bullion.

*Metallic stock of money in the United States.*

The estimated metallic stock of money in the United States, consisting of coin and bullion, on July 1, 1894, was, gold, \$627,293,201; silver, \$624,347,757; a total of \$1,251,640,958.

*Production of gold and silver in the United States.*

The estimated production of gold and silver in the United States during the calendar year 1893 was:

|             | Fine ounces. | Commercial value. | Coining value. |
|-------------|--------------|-------------------|----------------|
| Gold.....   | 1,739,323    | \$35,955,000      | \$35,955,000   |
| Silver..... | 60,000,000   | 46,800,000        | 77,576,000     |

The world's production of the precious metals for the calendar year 1893 was estimated to have been \$157,228,100 in gold and \$209,165,000 in silver.

*The world's coinage.*

Information received as to the coinages of the various countries of the world for the calendar year 1893 shows there were coined \$232,485,668 in gold and \$135,389,753 in silver.

## PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the Treasurer of the United States, nine subtreasury officers, and 170 national bank depositaries. The number of such depositaries on November 1, 1894, was 155, and the amount of public moneys held by them on that date, including those to the credit of the Treasurer's general account and United States disbursing officers, was \$14,915,705.30, an increase, since November 1, 1893, in number of depositaries of two, and a decrease in amount of holdings of \$541,625.74.

## LOANS AND CURRENCY.

The interest-bearing debt of the United States was increased \$50,003,820 during the twelve months ended November 1, 1894. The indebtedness at 4 per cent was increased \$3,820 through the issue of bonds on account of accrued interest on refunding certificates presented for redemption, as authorized by the act of Congress approved February 26, 1879; and there were issued and sold, in pursuance of the public notice of January 17, 1894, \$50,000,000 of 5 per cent bonds, dated February 1, 1894, redeemable in coin, at the pleasure of the Government after ten years from the date of their issue.

The public notice fixed 117.223 as the lowest price which would be considered by the Department, that price being the one at which the bonds should sell in order to yield to the purchaser an income of 3 per cent upon the amount of his investment. The total amount of subscriptions received and considered was \$52,292,150, of which \$9,295,300 were at prices above the limit fixed in the public notice. All these were accepted, and the remainder, \$42,996,850, were scaled down 5.331 per cent, making the total allotment of bonds at the limit of 117.223 \$40,704,700. It was provided in the public notice that payments should be made in gold coin, or gold certificates, and the total proceeds of the bonds were paid into the Treasury in strict accordance with this provision, as follows :

*Gold coin received.*

|                                                     |                  |
|-----------------------------------------------------|------------------|
| Treasury at Washington.....                         | \$7, 125. 99     |
| Subtreasury at Baltimore.....                       | 207, 281. 00     |
| Subtreasury at Philadelphia.....                    | 560, 041. 50     |
| Subtreasury at New York.....                        | 47, 021, 626. 00 |
| Subtreasury at Boston.....                          | 4, 071, 277. 50  |
| Subtreasury at Cincinnati.....                      | 384, 125. 06     |
| Subtreasury at Chicago.....                         | 307, 696. 00     |
| Subtreasury at St. Louis.....                       | 94, 180. 00      |
| Subtreasury at New Orleans.....                     | 12, 939. 93      |
| Subtreasury at San Francisco.....                   | 183, 971. 32     |
| Total.....                                          | 52, 850, 264. 24 |
| Gold certificates received.....                     | 5, 810, 240. 00  |
| Other forms of money received in making change..... | 233. 39          |
| Total proceeds of bonds.....                        | 58, 660, 917. 63 |

Bids which were received and not considered amounted to \$55,705,100. Of this amount five bids, amounting to \$705,100, were received after the time fixed for considering them; one other bid of \$2,000,000 was conditional, and for that reason was not considered. One bid for \$3,000,000 was rejected because no satisfactory address of the subscriber could be obtained, and the remainder, being fifty bids of \$1,000,000 each by one individual, was rejected because of the subscriber's lack of financial standing.

The amount of money in the United States, outside of the Treasury, November 1, 1894, was \$1,672,093,422, a decrease during the twelve months of \$46,451,260; but, during the same period, there was an increase in the total stock of money in the country of \$36,122,888. The population is estimated to have increased during the twelve months from 67,426,000 to 68,887,000, and, upon this basis, the per capita supply of the total stock declined during the period mentioned from 32.70 to 32.53. The per capita supply of money outside the Treasury fell during the same period from \$25.49 to \$24.27. The following tables

show the changes in each form of money, both as to the amount outside the Treasury and the total stock :

*Money outside of the Treasury.*

|                                              | Nov. 1, 1893. | Nov. 1, 1894. | Decrease.   | Increase.   |
|----------------------------------------------|---------------|---------------|-------------|-------------|

NATIONAL BANKS.

The report of the Comptroller of the Currency\* contains detailed information as to the organization, condition, and liquidation of all active and failed national banks for the year ended October 31, 1894.

On October 31, the total number of national banks in operation was 3,756, having an authorized capital stock of \$672,671,365, represented by 7,955,076½ shares of stock, owned by 287,842 shareholders.

The total resources of the 3,755 banks in operation and reporting on October 2, 1894, was \$3,473,922,055.27, of which loans and discounts aggregated \$2,007,122,191.30, and money of all kinds in bank \$422,428,192.45. Of their liabilities \$1,728,418,819.12 represented individual deposits, \$334,121,082.10 surplus and net undivided profits, and \$172,331,978 circulating notes outstanding. The total amount of circulation of national banks on October 31, was \$207,472,603, being a net decrease during the year of \$1,741,563, and a gross decrease of \$8,614,864 in circulation secured by a deposit of bonds.

Only fifty banks were organized during the year, with an aggregate capital stock of but \$5,285,000, the smallest number organized, as well as the minimum amount of capital, in any one year since 1879. Of

\* See Appendix, page 365.

these twenty-seven are located in the Northern and Eastern States; ten in the Southern States, and thirteen in the Western or transmississippi division.

The charters of forty-one banks, having a capital stock of \$5,143,000, and \$1,678,050 of circulation, were extended during the year, and seventy-nine banks passed out of the system by voluntary liquidation, with an aggregate capital stock of \$10,475,000. Twenty-one banks, including two which failed during the year 1893, with a capital stock of \$2,770,000, have become insolvent and been placed in charge of receivers. Of the banks that were in the hands of receivers at the date of the last report ten, with a capital stock of \$1,575,000, resumed during the year.

The charters of six banks, reporting a capital stock of \$665,000 and circulation amounting to \$283,950, expired by limitation. Of these five were succeeded by new associations, with a capital stock of \$600,000, and circulation aggregating \$92,250.

A comparison of the reports of 1893 with those of 1894 shows that the item of individual deposits declined from \$1,764,456,177 on December 9, 1892, to their lowest point, \$1,451,124,330, on October 3, 1893, but from that date they steadily increased to \$1,539,399,795 on December 19, 1893, \$1,586,800,444 on February 28, 1894, \$1,670,958,769 on May 4, 1894, \$1,677,801,200 on July 18, 1894, until on October 2, 1894, they had reached the sum of \$1,728,418,819, or an amount but \$36,000,000 less than on December 9, 1892, the highest point reached by individual deposits during the two years named.

On October 2, 1894, the banks had a surplus fund of \$245,197,517, and net undivided profits of \$88,923,564, as against a surplus fund of \$239,931,932, and undivided profits, after deducting expenses and taxes, of \$100,398,914 on December 9, 1892.

National bank notes outstanding increased from \$145,669,499 on December 9, 1892, to \$182,959,725 on October 3, 1893, after which date there was a decrease until July 18, 1894, when the amount outstanding reached \$171,714,552. Between the last-named date and October 2, 1894, the amount again increased to \$172,331,978.

On October 3, 1893, the liabilities of the banks for money borrowed in different forms amounted to \$80,126,026, which decreased by December, 19, 1893, to \$28,827,772. The same items on October 2, 1894, aggregated \$26,944,248.

The amount of United States bonds held to secure circulation on December 9, 1892, was \$166,449,250, which increased gradually during 1893, until October 3, 1893, when it reached \$206,463,850, the highest point attained during the two years named. After the last-mentioned date there was a slight decrease, the amount held on October 2, 1894, having been reduced to \$199,642,500. On December 9, 1892, the banks held for investment United States bonds amounting to \$4,148,600. This amount decreased until October 3, 1893, when they held \$2,760,950. On December 19, 1893, it increased to \$3,049,000, but on February 28,

1894, it reached \$17,250,150, the increase being chiefly due to investments in the 5 per cent bonds sold by the Government during the intervening period. After February 28, 1894, the amount held for investment gradually decreased until October 2, 1894, when the banks held \$10,662,200.

The amount of stocks and securities steadily decreased from December 9, 1892, until October 3, 1893, when it was but \$148,569,950. An increase then began and continued until October 2, 1894, when it reached \$193,300,072, indicating the extent to which this form of investments was resorted to by the banks during a period of easy money, commencing at the close of the monetary stringency and continuing while the cash resources of the banks were being replenished by depositors.

The specie held by the banks on December 9, 1892, amounted to \$209,895,260, which gradually decreased to \$186,761,173 on July 12, 1893, after which date it increased until May 4, 1894, when it amounted to \$259,941,923, and thereafter decreased to \$237,250,654, on October 2, 1894.

The lawful money reserve in the banks, which reached its lowest point on July 12, 1893, when it amounted to \$289,244,850, steadily increased thereafter until May 4, 1894, when it amounted to \$452,103,214. It then decreased again to \$438,931,970 on July 18, 1894, and still further to \$402,894,682 on October 2, 1894. This decrease in cash resources of the banks is accounted for by the marked increase in the item of loans and discounts during the same period, due to a gradual revival of business between the dates named, but more particularly between July 18, 1894, and October 2, 1894.

The average annual dividends of the banks between March, 1869, when the law requiring dividend reports to be made went into effect, and March, 1894, is shown to amount to \$44,355,814, and the net earnings to \$55,237,454. The rate per cent of dividends declared varies from 10.5 to 6.8, the average for the twenty-five years being 8.5.

A consolidation of rival banks is suggested in communities where banking has been overreached, as the best means of checking reckless banking resulting from unwholesome competition to obtain business sought by several institutions which could all be done by one strong bank.

The report contains the usual statistics in regard to banks other than national, but more complete in details than heretofore.

The report also contains statistics as to the interest of women in banks, showing the number and value of shares of stock owned by them, the number employed in banks, and the compensation paid them.

Twenty-one banks were placed in the hands of receivers during the year, having an aggregate capital of \$2,770,000; surplus and undivided profits, \$715,889; outstanding circulation, \$453,154; other liabilities, \$5,470,013, and total liabilities, \$9,409,356.

During the year, 143 insolvent banks have demanded the supervision of the Comptroller. Of these, 10 have been restored to solvency and have resumed business; the accounts of 8 have been finally closed, and 25 have been placed upon the inactive list, the accounts being kept open only to await the result of pending litigation, or to prevent a too great sacrifice of the remaining assets.

Among other subjects of interest discussed at length in the report of the Comptroller is the use of credit instruments in retail business transactions throughout the country, and their importance in payments and exchanges generally, as against the necessity of any additional provisions for simply increasing the volume of money, without taking into consideration the other and more important elements which should characterize the currency circulation.

The Comptroller also reports the result of investigations made as to the number of depositors in national banks, showing how many there are, and also the profit accruing to the Government through the tax levied upon the banks and the services of the banks to the public throughout the country.

He also suggests for the consideration of Congress that the provision of law requiring a deposit of bonds to secure circulation be repealed, and instead a provision made whereby the banks, upon depositing such percentage of their capital as is deemed necessary in the legal tender issues of the Government and the issues under the Sherman Silver Act of 1890, be permitted to issue notes to the extent of such deposit, and in addition also issue notes against their assets; the notes issued against their assets to be subject to the percentage of tax amply sufficient to create a safety fund, to be held by the Government for the purpose of redeeming the notes of insolvent banks.

The details of the plan suggested are not discussed, but simply its general principles. The Comptroller suggests that as the Government would permit the banks to issue notes against a portion of their assets, the banks should for such franchise relieve the Government of the continued embarrassment of the current redemption of its Treasury issues. He would have each bank in the system keep with the Treasurer or at each redemption agency a sufficient sum in gold coin or lawful money of the United States to currently redeem the notes issued by the banks, both against the Treasury note deposit and the notes issued against the assets of the banks. He believes that all other provisions of the National Bank Act should remain as they are, except those wherein such change can be made as will make the system more conducive to the public good than it now is, and that whatever legislation is enacted upon the subject of note issues should be so carefully prepared and surrounded by such safeguards as would make the issues of the banks as safe as they are now. Any changes which are made should be to secure, upon the one hand, a greater elasticity in the note-issuing function of the banks, and

at the same time give such relief as is possible to the General Government from the dangers incident to the current redemption under existing laws, of notes issued by the Treasury Department.

## FOREIGN COMMERCE.

The returns of foreign commerce for the fiscal year ended June 30, 1894, and a comparison with the preceding year, are shown in the following table:

|                             | 1893.         | 1894.         |
|-----------------------------|---------------|---------------|
| Imports:                    |               |               |
| Merchandise: Dutiable ..... | \$421,856,711 | \$275,199,086 |
| Free .....                  | 444,544,211   | 379,795,536   |
| Total .....                 | 866,400,922   | 654,994,622   |
| Gold .....                  | 21,174,381    | 72,449,119    |
| Silver .....                | 23,193,252    | 13,286,552    |
| Exports:                    |               |               |
| Merchandise: Domestic ..... | 831,030,785   | 869,204,937   |
| Foreign .....               | 16,634,409    | 22,935,635    |
| Total .....                 | 847,665,194   | 892,140,572   |
| Gold .....                  | 108,630,844   | 76,898,061    |
| Silver .....                | 40,737,319    | 50,451,265    |
| Tonnage: Entered .....      | 19,581,816    | 20,069,309    |
| Cleared .....               | 19,760,746    | 20,275,074    |
| Immigration .....           | 502,917       | 314,467       |

It appears from the foregoing statement that the total value of our imports of merchandise during the fiscal year 1894 was \$201,406,800 less than in 1893, while the total value of our exports of merchandise, domestic and foreign, was \$44,495,378 more than in 1893. Our exports of merchandise exceeded our imports of merchandise to the amount of \$237,149,950.

## CUSTOMS ADMINISTRATION.

There is great necessity, in my opinion, for a reorganization of the customs districts throughout the country. There are now many ports of entry at which little or no business is transacted, and which should be abolished. Many of these places were important when foreign trade was carried on in sailing vessels and before the concentration of the importing business at a few of the larger ports by the employment of regular lines of large ocean steamers and the present system of rapid inland transportation. Notwithstanding these changed conditions, the custom-houses, with collectors, deputies, inspectors, and clerks, are still maintained. A consolidation of the districts and a reduction of the number of ports of entry may be accomplished without impairing the means necessary to protect the revenue against smugglers and without withdrawing proper facilities for documenting vessels. The appropriation for the collection of the revenue from customs was fixed many years ago, and the necessities of business have required the establish-

ment of new ports, with a consequent increase of expense. Whatever expenditure of public money is necessary to protect the revenue or accommodate shipping interests should be authorized, but sound business considerations and the exercise of proper economy would seem to demand such action by Congress as will enable the Secretary of the Treasury to consolidate customs districts whenever, in his judgment, such proceeding is necessary. An examination of the tables accompanying this report,\* showing the business at the ports throughout the country and the cost of maintaining them, will emphasize the suggestion herein made.

*Penal duties.*

The penal additional duties provided for in section 7 of the Customs Administrative Act have, in many cases, been found to work extortion and injustice. These duties have frequently amounted to a practical confiscation of the goods, as, for instance, one importation at New York accidentally undervalued at \$35, and appraised at \$350, was found liable to additional duties amounting to \$12,500. In virtue of the power conferred by the statutes upon the Secretary of the Treasury, I have considered it expedient in some instances to intervene for the protection of the importer, by a remission of the penal duties on payment of the regular duty upon the appraised value of the goods.

The substitution of the following for section 7 of the existing act is recommended :

SEC. 7. "That the owner, consignee, or agent of any imported merchandise which has been actually purchased, may, at the time when he shall make and verify his written entry of such merchandise, but not afterwards, make such addition in the entry to the cost or value given in the invoice, or pro forma invoice, or statement in form of an invoice, which he shall produce with his entry, as in his opinion may raise the same to the actual market value or wholesale price of such merchandise at the time of exportation to the United States, in the principal markets of the country from which the same has been imported, but no such addition shall be made upon entry to the invoice value of any imported merchandise obtained otherwise than by actual purchase; and the collector within whose district any merchandise may be imported or entered, whether the same has been actually purchased or procured otherwise than by purchase, shall cause the actual market value or wholesale price of such merchandise to be appraised; and if the appraised value of any article of imported merchandise shall exceed by more than ten per centum the value declared in the entry, there shall be levied, collected, and paid, in addition to the duties imposed by law on such merchandise, a further sum equal to one per centum of the total appraised value for each one per centum that such appraised value exceeds the value declared in the entry; and

---

\* See Report of Supervising Special Agent in the Appendix, page 957.

the additional duties shall only apply to the particular article or articles in each invoice which are undervalued, but such additional duties shall not exceed forty per centum in any case; and if such appraised value shall exceed the value declared in the entry more than forty per centum, such entry may be held to be presumptively fraudulent, and the collector of customs may seize such merchandise and proceed as in cases of forfeiture for violation of the customs laws; and in any legal proceedings which may result from such seizure the fact of such undervaluation shall be presumptive evidence of fraud, and the burden of proof shall be on the claimant to rebut the same, and forfeiture shall be adjudged unless he shall rebut said presumption of fraudulent intent by sufficient evidence: *Provided*, That the forfeitures provided for in this section shall apply to the whole of the merchandise or the value thereof in the case or package containing the particular article or articles in each invoice which are undervalued: *And, provided further*, That all additional duties, penalties, or forfeitures applicable to merchandise entered by a duly certified invoice shall be alike applicable to goods entered by a pro forma invoice or statement in form of an invoice. The duty shall not, however, be assessed upon an amount less than the invoice or entered value: *And provided further*, That whenever the Secretary of the Treasury shall be satisfied that such additional duties were incurred without willful intent to defraud the revenue, he is hereby authorized, in accordance with the provisions of section 5293 of the Revised Statutes to remit such additional duties and to allow the liquidation of the entry at the duty upon the value returned by the appraiser, or on appeal, by the Board of General Appraisers."

It occasionally happens that, through the dishonesty or carelessness of laborers or other employes in the appraising office of customs, serious damage occurs to imported merchandise while it is in the appraiser's hands for examination. In some instances there have been considerable losses by robbery. There is, under the present laws, no provision for the reimbursement of such losses, and it is recommended that Congress take this matter into consideration with a view of determining whether it would not be proper to confer upon the Secretary power to pay to actual owners, or their legal representatives, the amount of any losses from the causes above specified. The importer is denied the custody of such goods pending examination, such custody being assumed by the officers of the Government. It is difficult to deny the responsibility of the Government for the safety of the goods, as the equitable claim of the owner to compensation for losses occasioned by the negligence of its officials who have exclusive charge of the goods, seems to be well founded.

*Ports of delivery in New Orleans district.*

Attention is called to the provisions of section 2568, Revised Statutes, which constitutes all the ports on the Mississippi River and its tributa-

ries ports of delivery within the customs collection district of New Orleans. The causes which led to the passage of this law do not now exist by reason of the altered means of communication, and I am of opinion that the section of the statutes referred to should be repealed, and, if necessary, that the chief officers at the more important ports on the river and its tributaries be designated as collectors instead of surveyors of customs.

### *Enforcement of Chinese Exclusion Act.*

The appropriations heretofore made annually for the enforcement of the Chinese exclusion laws are inadequate for the purpose. To properly enforce these statutes involves the employment of inspectors, not only at ports where Chinese arrive directly by vessels, but at various places on the Mexican and Canadian frontiers, and also at places in the interior where there are large Chinese colonies. The expense involved in investigating cases where Chinese unlawfully enter the United States, in the trial of those arrested, and the deportation of those convicted, including their transportation to the Pacific coast, is very large, and the appropriation referred to should, in my judgment, be not less than \$100,000 per annum. The pending treaty between China and the United States, under which laborers residing here may, under certain conditions, leave this country and return thereto, will necessitate the exercise of greater vigilance and a consequent increase in expense.

### *Sampling and Assaying Imported Ores.*

Section 165 of the tariff act of 1894 provides for the sampling and assaying of lead and other ores at the ports of entry. It will be necessary, in order to comply with this requirement of the law, that an appropriation be made for the establishment, at probably six places on the Canadian and Mexican borders, of sampling works equipped with suitable appliances. I therefore recommend action in the direction indicated.

### INTERNAL REVENUE.

The receipts from the several objects of taxation under the internal-revenue laws for the fiscal years ended June 30, 1893 and 1894, were as follows:

| Objects of taxation.            | Fiscal year ended June 30— |                 | Increase.   | Decrease.      |
|---------------------------------|----------------------------|-----------------|-------------|----------------|
|                                 | 1893.                      | 1894.           |             |                |
| Distilled spirits .....         | \$94,720,260.55            | \$85,259,252.25 | .....       | \$9,461,008.30 |
| Manufactured tobacco .....      | 31,889,711.74              | 28,617,898.62   | .....       | 3,271,813.12   |
| Fermented liquors .....         | 32,548,983.07              | 31,414,788.04   | .....       | 1,134,195.03   |
| Oleomargarine .....             | 1,670,643.50               | 1,723,479.90    | \$52,836.40 | .....          |
| Miscellaneous collections ..... | 175,390.81                 | 153,030.89      | .....       | 22,359.92      |
| Total .....                     | 161,004,989.67             | 147,168,449.70  | .....       | 13,836,539.97  |

|                                                                                                       |                     |
|-------------------------------------------------------------------------------------------------------|---------------------|
| The receipts from all sources of internal revenue for the fiscal year ending June 30, 1894, were..... | \$147, 168, 449. 70 |
| The receipts from the same sources for fiscal year ended June 30, 1893, were .....                    | 161, 004, 989. 67   |
| Making a decrease in the receipts for the fiscal year just ended of..                                 | 13, 836, 539. 97    |
| The total cost of collection for the fiscal year ended June 30, 1894, was..                           | 3, 975, 904. 00     |
| The total cost of collection for the fiscal year ended June 30, 1893, was..                           | 4, 219, 769. 69     |
| Decreased cost of collections for the fiscal year ended June 30, 1894, was.....                       | 243, 865. 69        |

The amounts above stated are the receipts actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the first day of July, thus causing a discrepancy between the collections and deposits.

A detailed statement of the receipts and expenditures will be found in the report of the Commissioner of Internal Revenue.\*

It is estimated that the receipts from all sources of internal revenue for the fiscal year ended June 30, 1895, will aggregate \$165,000,000.

The percentage of cost of collection for the fiscal year ended June 30, 1894, was 2.70 per cent, as against 2.62 per cent for the fiscal year ended June 30, 1893.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1894, was 89,205,492 taxable gallons; the total production for the fiscal year ended June 30, 1893, was 128,651,782 taxable gallons, showing a decrease in the production for the fiscal year just ended of 39,446,290 gallons. There were also produced during the fiscal year ending June 30, 1894, 550,695 gallons of apple brandy, 76,989 gallons of peach brandy, and 2,320,474 gallons of grape brandy, making a total production of 2,948,158 gallons of brandy from fruits during that year. A further comparison of the two fiscal years shows a decrease of 51,174 gallons in the production of apple brandy, an increase of 19,400 gallons in the production of peach brandy, and an increase of 621,384 gallons of grape brandy for the fiscal year ended June 30, 1894, an aggregate increase of 589,610 gallons of brandy produced from fruits as compared with the previous fiscal year.

The quantity of distilled spirits gauged for the fiscal year ending June 30, 1894, was 242,626,324 gallons; the quantity gauged for the fiscal year ended June 30, 1893, was 311,821,533 gallons, making a decrease in the quantity of spirits gauged for the fiscal year just ended of 69,195,209 gallons.

During the fiscal year ending June 30, 1894, 5,148 distilleries of all kinds were operated; for the preceding fiscal year 4,745 distilleries of all kinds were operated, a comparison showing an increase of 403 in the number of distilleries operated for the fiscal year just ended.

\* See Appendix, page 597.

During the fiscal year ended June 30, 1894, there were produced 33,362,373\* barrels of beer; the number of barrels produced during the fiscal year ended June 30, 1893, was 34,591,179, making a decreased production for the fiscal year just ended of 1,228,806 barrels.

For the fiscal year ended June 30, 1894, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were \$28,617,898.62. The receipts from the same sources for the fiscal year ended June 30, 1893, were \$31,889,711.74, showing a decrease of \$3,271,813.12 for the fiscal year ended June 30, 1894.

*Sugar bounty.*

Total bounty paid upon sugar produced in the United States for the fiscal year ending June 30, 1894, was \$12,100,208.89; the bounty paid upon sugar for the fiscal year ending June 30, 1893, was \$9,375,130.88, making an increase of \$2,725,078.01 for the last year.

The amount of bounty paid from July 1, 1894, to August 28, 1894, the date when further payments ceased by operation of law, was \$966,185.84.

*Expenses relating exclusively to the payment of the bounty on sugar for the fiscal year ended June 30, 1894.*

|                                                                                    |             |
|------------------------------------------------------------------------------------|-------------|
| Additional deputies, clerks, and employes.....                                     | \$96,229.83 |
| Laboratory supplies, etc .....                                                     | 591.74      |
| Sugar inspectors .....                                                             | 24,749.28   |
| Salaries of clerks, etc., in the office of the Commissioner of Internal Revenue... | 8,570.00    |
| Total .....                                                                        | 130,140.85  |

The expenses for the same purpose in the fiscal year ended June 30, 1893, were \$138,586.27, making a decrease of \$8,445.42 for the fiscal year ended June 30, 1894.

I respectfully call attention to the various recommendations contained in the report of the Commissioner of Internal Revenue, and ask their favorable consideration by Congress.

ENGRAVING AND PRINTING.

The consolidation of all the engraved and plate-printed work in the Bureau of Engraving and Printing makes it the largest establishment of the kind in the world, and, through good management, should secure the best results from its operations. The greater aggregate amount of work lessens the net cost per thousand impressions, and it is reasonable to expect that the securities of the Government will be printed at the lowest possible rate. There were 55,516,961 sheets produced during the fiscal year 1894, at a cost of \$23.73 per thousand, which is a lower

\* Including 27,590 barrels removed for export free of tax.

rate than was ever before reached. The estimated number of sheets to be printed during the fiscal year 1896 is 70,211,171, requiring printings to the enormous number of nearly one hundred millions.

The transfer of the adhesive postage-stamp contract to this Bureau will, after the present year, be productive of a large annual saving to the Government. While there were at first some imperfections in the deliveries of stamps, the present output is satisfactory to the Post-Office Department, and in a very short time will be entirely satisfactory to the people. In fact, the Bureau has demonstrated its ability to successfully perform this work.

It has been deemed advisable to improve the designs adopted by the Department for the various bank-note issues of the Government, and to accomplish this end the best artists of the country have been invited to contribute, and are now submitting designs to supersede the defective and insecure forms used in the past. It is expected that the future notes and certificates issued by the Government, if this policy is continued, will be not only highly creditable from an artistic standpoint, but will be beyond the skill of counterfeiters to imitate to such an extent as to be at all dangerous to the public.

The work of engraving the plate of the diploma for the World's Columbian Exposition has progressed satisfactorily, and it is expected that the issue of these diplomas will be commenced at an early day. This diploma will be a beautiful work of art, creditable to the designer, the engraver, the Bureau, and the country.

#### IMMIGRATION.

The report of the Superintendent of Immigration shows the arrival during the year of 288,020 immigrants, 2,389 of whom were debarred and returned to their respective countries at the expense of steamship companies. The number not admitted includes 1,533 who came under contract made previous to arrival to perform labor in the United States, and 836 who belonged to the other excluded classes. There were also returned 417, who became public charges within one year after arrival. To such an extent have our almshouses, hospitals, and insane asylums been relieved of immigrants who have become a burden upon the country, within one year after landing, from causes existing prior thereto, that the Bureau is not advised of any now being supported who should have been deported at the expense of the steamship companies bringing them to the United States. Many others who have become charges during the same period for causes existing subsequent to landing, the nature of which was likely to be of a permanent character, have, at their request, been returned to their homes at the expense of the immigrant fund.

A great decrease in the volume of immigration, as compared with recent years, is shown. In 1893 the arrivals numbered 440,783, which was a decrease of 141,044 from the previous year, while the reports for the last fiscal year show a further decrease of 152,763, or 293,807 less

than in 1892. In 1893 the decrease was caused mainly by the suspension of immigration on account of cholera. The decrease this year may be attributed largely to the general business depression, which produced a condition not encouraging to classes seeking new and better homes; but no doubt through more efficient execution of the laws, many belonging to the least desirable classes have been prevented from coming. Under loose statutes and laxity in their execution, these classes have previously entered our ports in great numbers, and the totals of other years were thus largely augmented.

Next to Sweden, Italy shows the least percentage of decrease. This is accounted for by the existence of the *padrone* system, and it is gratifying to report that the Government of Italy has expressed a desire to cooperate in the eradication of this evil.

Russia and Poland contribute the largest percentage of decrease, which is due partly to the fact that Russia has now ceased to execute its edicts against the Jews, and to the extensive colonization of that people in the Argentine Republic, under the direction of Baron Hirsch.

An interesting and significant report from the port of New York shows that of 219,046 arrivals there, 29,827 were returning to the United States, and 91,037 came to join immediate families, while the number embracing collaterals who came attracted by family ties is not shown. The same is true at other ports, and indicates that for the fiscal year the number who came only for the purpose of seeking better fortune was comparatively small.

The responsibility of steamship lines under the act of March 3, 1893, while operating as a restriction upon immigration has at the same time produced very satisfactory results in the way of raising the general standard of those who came. There seems to be no doubt that as the present system of inspection, first, at the home of the intending emigrant, second, at the port of embarkation, and, third, upon arrival in this country, becomes better understood, it will be even more remedial.

The exposed condition of the Canadian frontier has heretofore enabled many to enter this country who would have been refused admission on inspection at any of our ports; but early in the year the Superintendent of Immigration, by an arrangement with the various transportation companies interested, succeeded in establishing a system, which, conducted at small cost to the immigrant fund, has effectually served to guard the long line of frontier, and to divert from Canadian land routes vast numbers who sought thereby to avoid the inspection provided by law at ports of the United States. By this arrangement the immigration service has solved a serious problem and been relieved of a troublesome annoyance.

The inspection of immigrants has been made uniform at the various ports, and the management of the local affairs of immigration brought well within the control of the General Government, so that uniformity and a commendable standard of efficiency now prevail.

Various measures of economy have also been successfully instituted at several ports, resulting in a substantial saving to the immigrant fund, and added benefit to the service.

The attention of Congress is again invited to the recommendation of the Superintendent of Immigration, in which I concur, that it will at an early date carefully revise and reenact the Alien Contract Labor Laws, making them more certain, explicit, and comprehensive, and giving effective remedies to insure their enforcement.

#### MARINE-HOSPITAL SERVICE.

The Surgeon-General of the Marine-Hospital Service reports that the nineteen marine hospitals owned and operated by the Service are in excellent condition, in consequence of careful attention to work of repair during the year, and that at these hospitals and the other 136 relief stations there were treated during the fiscal year 52,803 patients; 13,725 were treated in hospitals, and the remainder, 39,078, were dispensary or out patients. Ninety-four seamen of the merchant marine were examined before shipment as to their physical fitness and 5 were rejected.

The sum total of the Marine-Hospital fund available during the fiscal year was \$658,072.16, and the expenditures from this fund were \$586,741.75, leaving a balance June 30 of \$71,330.41. The balance of the appropriation for the prevention of epidemic diseases available June 30, 1894, was \$601,773.79.

During the year one board of examiners was convened to examine candidates for admission into the regular corps of the Service. Twenty-seven applicants appeared, of which number four only were successful. These four have all been appointed assistant surgeons. Notwithstanding the great increase of work thrown upon the Marine-Hospital Service by reason of the passage of the Quarantine Act of February 15, 1893, since that act there have been but three additions to the number of medical officers in the regular corps.

During the year, in aid of the inspection service of steam vessels, 628 pilots were examined by the officers of this Service for color-blindness, of which number 26 were rejected.

In aid of the Life-Saving Service 1,076 surfmen and keepers were examined as to their physical fitness, of which number 22 were rejected. One hundred and seventy claims of keepers and surfmen for the benefits under section 7 of the act of May 4, 1882, were referred to the Bureau for examination of the medical evidence submitted and opinion as to the probable cause and effect of the diseases and injuries on which the claims were based. By act of Congress approved August 4, 1894, the benefits of the marine hospitals have been extended to the keepers and crews of the Life-Saving Service, and regulations carrying the law into effect have been duly issued by this Department.

In aid of the Revenue Cutter Service, two boards of medical officers

have been convened to pass upon the physical qualifications of candidates for promotion and of candidates for appointment as cadets in said Service. Two hundred and twenty seamen were examined physically prior to enlistment to determine their physical fitness for the Revenue Cutter Service, of which number 21 were rejected.

In aid of the Immigration Service medical officers of the Marine-Hospital Service have been stationed at Boston, New York, Philadelphia, and Baltimore. At the other ports where immigrants occasionally arrive the service of the officers on duty in the marine hospitals are available when required. The number of immigrants inspected by the marine hospital officers during the fiscal year 1894, as reported to the Bureau, was 296,614, of which number 244 were rejected under the law.

In the laboratory of the Service examinations have been made of the dejecta of immigrants arriving on steamships, and in two cases diagnoses of true cholera were confirmed. Pathological examinations have also been made to determine the diagnosis of yellow fever. Bacteriological analyses have been made of samples of the water from suspected quarters at the request of various health officers of the United States. Water from a number of the wells in the District of Columbia have been examined, and 90 per cent of the wells examined found to be contaminated with sewage. A systematic course of instruction in bacteriology has been conducted for the benefit of the officers of the Service and others. Investigations concerning the etiology and pathology of the eruptive fevers, and in preventive inoculation against acute infectious diseases have been and are now being conducted. A bacteriologist of the Service is now in Europe familiarizing himself with the latest advances in preventive inoculation. A supply of toxine has been forwarded to the Bureau, and animal immunization is now in progress with a view of obtaining the antitoxine serum for the prevention and cure of diphtheria.

*National quarantine service.*

The medical officers of the Marine-Hospital Service detailed by the President to serve during the cholera epidemic of 1893 at London, Liverpool, Southampton, Glasgow, Bremen, Hamburg, Rotterdam, Antwerp, Havre, Marseilles, Genoa, and Naples were recalled December 1, 1893. One experienced surgeon, however, was kept in foreign countries in order to give reliable information as to the prevalence and spread of cholera. This officer during the past season visited the cities most available for obtaining the desired information, investigated rumors and reports of cholera, visited the most important consulates to observe the method of enforcing the Treasury regulations, and made weekly reports to the Surgeon-General, supplementing the same frequently by cable dispatches. In this manner accurate information was constantly available in the United States relative to the threatening epidemic.

The foreign quarantine regulations, including those relating to the

detention of suspected immigrants coming from infected districts, and the disinfection of their baggage, were enforced by the consular officers.

During the year the quarantine regulations made in accordance with the act of February 15, 1893, were revised. Some of the restraints placed in foreign ports upon articles of merchandise having been found as a result of increased knowledge and practical experience to be unnecessary, were removed or modified. As a result, during the past year there has been no interference, practically, with commerce so far as merchandise is concerned ; at the same time the public health has been efficiently guarded.

The two principal diseases against which precautions were necessary during the past year were cholera and yellow fever, the former being feared by reason of its continuance throughout Europe, although it was not epidemic at any of the great seaports with which the United States has intimate commercial relations. There was some apprehension of a recurrence of yellow fever in the South as a result of the epidemic in Brunswick in the year previous, which came to a close November 30, 1893. On account, however, of the post-epidemic disinfection carried on in the city of Brunswick and in the town of Jesup by the officers of the Marine-Hospital Service, there was no reappearance of the disease.

In order, however, that the Bureau might be promptly informed if the disease should reappear, and upon invitation of the board of health of Brunswick, after overtures were made by the Bureau to this end, an experienced surgeon was stationed in the city of Brunswick in order to determine upon any doubtful cases, and to give timely warning. At the same time, under the act of Congress of February 15, 1893, and the Treasury regulations promulgated in accordance therewith, to the effect that the Surgeon-General of the Marine-Hospital Service should from time to time personally, or through a detailed officer inspect all quarantines, the seaboard of the United States, from Maine to the State of Washington, was divided into districts, and each district allotted to an experienced surgeon of the Service who made periodical inspections of the quarantine systems at every port of entry within his district, making his report upon a prescribed form which embraced every desired detail.

Particular attention was paid to the South Atlantic and Gulf coasts, which are especially threatened with the invasion of yellow fever each summer. From Wilmington, N. C., to Brownsville, Tex., during what is known as the yellow fever season, the coast was under almost constant patrol by an officer of the Service inspecting local quarantines and reporting upon such deficiencies as were found to exist. The attention of the several State boards of health or local quarantine boards was called to these deficiencies, and they were generally made good, but in some instances where through want of proper organization no action by local authorities could be taken, appropriate action was taken by the Bureau. These inspections were well received by the State and local

authorities, all of which manifested a desire to cooperate with the Bureau in its efforts to prevent the introduction and spread of disease. There can be no doubt that the presence of these inspectors, who were men of large experience in quarantine measures, had a salutary influence; and owing largely to the prudent conduct of the medical officers, in no instance was their presence resented.

The records of the various quarantine stations show that a large number of infected vessels received treatment and an unusual number of yellow-fever patients were taken therefrom. At the Key West quarantine station, Dry Tortugas, eleven cases of yellow fever were taken from vessels bound for the United States. The necessity of the quarantine service, particularly in the South, is amply demonstrated by the season's record, and the necessity will continue until all the Southern seaboard cities have been placed in such sanitary condition as will prevent the spread of this imported disease.

The Surgeon-General reports that the twelve quarantine stations of the United States are in good condition and are thoroughly equipped, with the exception of Port Townsend and San Diego, whose equipment will be shortly completed. During the year the quarantine station at Reedy Island has been completed, and this, together with the station at the Delaware Breakwater, is amply sufficient for the protection of all cities and towns upon the Delaware Bay and River. The Station on Fishermans Island has also been completed, and the vessel *Jamestown*, turned over to the Bureau by the Navy Department, has been supplied with a fumigating furnace and steam disinfecting chamber, and is a complete quarantine station in itself.

Following the destruction of the Chandeleur quarantine by storm October 1, 1893, the station was temporarily removed to Ship Island, and Congress in the appropriation act, approved August 18, 1894, has approved its rehabilitation at this point. Until this act of Congress was passed it was necessary to order that infected vessels bound for the port of Mobile should be cared for by the municipal quarantine, against which a vigorous protest was made. As soon as the act was passed this order was revoked and permission given to send all infected vessels to Ship Island.

#### *Interstate Quarantine.*

In accordance with the law of February 15, 1893, regulations have been promulgated by the Department for the purpose of preventing the introduction of contagious diseases into one State or Territory, or the District of Columbia, from another State or Territory or the District of Columbia. These regulations, prepared in the Marine-Hospital Bureau, relate at present only to specific diseases, viz: cholera, yellow fever, smallpox, typhus fever, leprosy, and plague. It has not been deemed advisable to add other diseases to this list at the present time; but the regulations are comprehensive in their character, permitting minor details to be supplied by local health authorities if desired.

The attention of Congress is invited to the necessity of making some provision for carrying into effect section 8 of the act of February 15, 1893, which is as follows:

"SEC. 8. That whenever the proper authorities of a State shall surrender to the United States the use of the buildings and disinfecting apparatus at a State quarantine station, the Secretary of the Treasury shall be authorized to receive them, and to pay a reasonable compensation to the State for their use, if in his opinion they are necessary to the United States."

Since the passage of this act two States, Pennsylvania and North Carolina, have practically surrendered their quarantine functions, and an important seaport of another State, Brunswick, Ga., has, under authority conferred by law, been deprived of its quarantine functions because of inefficiency.

The maintenance of these quarantine stations has been provided for in the appropriations for the present fiscal year, but other States and other local authorities are contemplating the surrender of their quarantine functions, and it is desirable that a definite policy regarding the stations so surrendered should be adopted and provision made for their equipment and maintenance through a general fund to be established for that purpose by fees collected from vessels or otherwise, as may be determined by Congress, from which fund all the quarantine expenses of the United States shall be paid.

#### REVENUE CUTTER SERVICE.

During the past fiscal year thirty-five vessels have been in commission which have been constantly engaged in patrolling the coasts, rivers, and harbors of the United States, for the protection of the revenue and the enforcement of law relative to other subjects.

The following is a statistical statement of duties performed:

|                                                                                                                         |                   |
|-------------------------------------------------------------------------------------------------------------------------|-------------------|
| Aggregate number of miles cruised by vessels of the Service.....                                                        | 308, 682          |
| Number of merchant vessels boarded and examined.....                                                                    | 29, 727           |
| Number of merchant vessels found violating the law in some particular and seized or reported to proper authorities..... | 482               |
| Fines or penalties of vessels so seized or reported.....                                                                | \$98, 335. 70     |
| Number of vessels in distress assisted.....                                                                             | 70                |
| Value of vessels and their cargoes imperiled by the sea, thus assisted.....                                             | \$1, 709, 105. 00 |
| Number of persons on board vessels assisted.....                                                                        | 658               |
| Miles cruised in the performance of duties connected with Life-Saving Service.....                                      | 7, 615            |

During the year, 87 lives were saved. Of this number 78 were actually taken out of the water and saved from drowning, and 9 were of the shipwrecked crew of the American whaling bark *James Allen*, rescued by the steamer *Bear*.

The revenue steamers *Bear*, *Rush*, and *Corwin* were designated by the President as part of the fleet under command of Commander C. E. Clark, U. S. Navy, charged with patrolling the North Pacific Ocean and Bering Sea for the enforcement of the provisions of the acts of Congress, approved April 6 and April 24, 1894, and the President's proclamation issued April 9, 1894, for the protection of the fur seal and the interests of the Government on the seal islands, Alaska. The efficiency of these vessels in the performance of the duties assigned them under the direction of the Secretary of the Navy has elicited the highest commendations from the naval officers under whose immediate command they were operating.

By request of the Secretary of the Interior, the steamer *Bear* continued the service of previous years in connection with the reindeer station at Port Clarence, Alaska. She made several trips to the coast of Siberia, from which 134 reindeer were transported to the station. This vessel also rendered service of importance in the way of transportation, relief, and furnishing supplies to the mission schools established at the different points along Bering Sea, and the Arctic Ocean to Point Barrow, and in furnishing medical supplies and treatment to the natives on the Alaskan coast, and to the whaling fleet.

On June 12, in the Bering Sea, the *Bear* discovered and picked up a boat containing the master (Arthur Huntley) and 6 men of the American whaling bark *James Allen*, of San Francisco, which had been wrecked, May 11, in Sequam Pass, Aleutian Islands. They reported that 10 of their ship's company were on Umnak Island, 130 miles distant, without food or shelter. The cutter at once proceeded to their rescue, and on the 14th June the men were found in a famishing condition. One having in the meantime died of starvation and exposure, the 9 remaining were taken on board the vessel, properly cared for, and transportation to San Francisco subsequently secured for them.

For several years Spanish fishing smacks from the Island of Cuba have frequented the west coast of Florida, carrying on a small illicit trade in liquor and tobacco, and totally ignoring our customs and quarantine laws. In July last the revenue steamer *McLane*, Lieut. O. S. Willey, commanding, seized in Anclote Harbor, Florida, twelve of these vessels and delivered them to the proper authorities for trial, which it is believed will have the effect of breaking up this trade.

The steamer *Manhattan* has continued on duty in the enforcement of the provisions of the act approved May 16, 1888, relating to the anchorage of vessels in the harbor of New York. The advantages of the enforcement of this law in keeping the channels open to vessels plying in the waters of this harbor is demonstrated by the comparative number of vessels reported for being outside the limits prescribed for anchorage during the first year after the enactment of the law, and the number so

reported during the year ended June 30 last; the numbers being respectively 1,750 and 490.

The revenue cutters during the year rendered material assistance, as customary, to the Life-Saving Service, boats, stores, and supplies having been transported and delivered at stations off established routes of travel and difficult of access, except by special conveyance.

One new vessel of the third class (steamer *Calumet*), has been completed during the year, and placed in commission for service at Chicago, Ill. A number of new vessels are urgently needed for the proper maintenance of the Service. Many of the present vessels when first placed in commission were of sufficient size to perform the work then required of them, but they are now entirely too small to meet the enlarged duties of the Service. The cutters at present on the Pacific coast, with the exception of the steamer *Bear*, are not adapted to the arduous work which of late has devolved upon them in Alaskan waters and in Bering Sea. The necessary withdrawal of these steamers from the California and Oregon coasts for duty with the Bering Sea fleet during the summer has left those districts without patrol and caused serious embarrassment to the Customs Service. A new steamer is needed for service on the Pacific coast, one at the port of New York to replace the steamer *Grant*, assigned to duty on Puget Sound, and one on the Great Lakes to replace the steamer *Geo. M. Bibb*, condemned and sold, being no longer seaworthy.

The personnel of the Revenue Cutter Service consists of 222 commissioned officers and 815 pilots and enlisted men. Owing to the absence of any law authorizing retirement, 33 per cent of the officers in the senior grades of the Service have become incapacitated for active service, by reason of advanced age or physical disability contracted in the line of duty. The higher grades contain so many of these superannuated officers that the efficiency of the Service is seriously impaired.

A bill (H. R. 6723) now pending in Congress will provide the necessary legislation for the correction of this evil, and I urgently recommend its enactment into law during the present session.

The expense of conducting the Service has been \$927,445.88, of which sum \$19,248.19 were used in enforcing the provisions of the act of Congress approved May 16, 1888, regulating the anchorage of vessels in the bay and harbor of New York.

#### NAVIGATION.

The annual report of the Commissioner of Navigation shows the strength, geographical distribution, material and motive power, and

employment of the documented merchant marine of the United States on June 30, 1894, compared with June 30, 1893, as follows:

|                                  | 1894.              |           | 1893.              |           |
|----------------------------------|--------------------|-----------|--------------------|-----------|
|                                  | Number gross tons. |           | Number gross tons. |           |
| Total shipping.....              | 23,586             | 4,684,029 | 24,512             | 4,825,071 |
| GEOGRAPHICAL DISTRIBUTION.       |                    |           |                    |           |
| Atlantic and Gulf.....           | 17,468             | 2,712,944 | 17,913             | 2,807,690 |
| Pacific coast.....               | 1,520              | 456,359   | 1,549              | 457,422   |
| Northern lakes.....              | 3,341              | 1,227,401 | 3,761              | 1,261,067 |
| Western rivers.....              | 1,257              | 287,325   | 1,289              | 298,892   |
| Total.....                       | 23,586             | 2,684,029 | 24,512             | 4,825,071 |
| POWER AND MATERIAL.              |                    |           |                    |           |
| Sail:*                           |                    |           |                    |           |
| Wood.....                        | 17,016             | 2,443,187 | 17,911             | 2,596,624 |
| Iron and steel.....              | 44                 | 51,412    | 40                 | 45,175    |
| Total.....                       | 17,060             | 2,494,599 | 17,951             | 2,641,799 |
| Steam:                           |                    |           |                    |           |
| Wood.....                        | 5,715              | 1,311,097 | 5,782              | 1,332,911 |
| Iron and steel.....              | 811                | 878,333   | 779                | 890,361   |
| Total.....                       | 6,526              | 2,189,430 | 6,561              | 2,183,272 |
| Canal boats.....                 | 745                | 82,362    | 1,184              | 126,279   |

\*Including canal boats and barges.

The decrease in tonnage is more apparent than real, being attributed in part to closer revision of the lists of documented vessels than has been made of late years. While the decrease of construction in American yards during the year has been considerable, a like decrease has been observed in foreign yards.

The amount of tonnage taxes for the fiscal year covered into the Treasury was \$537,798.19. Modifications of the laws concerning tonnage taxes and net tonnage are suggested by the Commissioner of Navigation. These and the suggested abolition of registry bonds and extension of the powers of the Secretary of the Treasury to mitigate or remit fines upon vessels are commended to the attention of Congress.

The enactment of the tariff law, the small tonnage of our merchant marine registered for foreign trade, and modern conditions of over-sea navigation suggest the necessity for a prompt amendment of the laws concerning the registry of vessels. I concur, therefore, in the recommendation for the repeal of that portion of the law of 1792 which prohibits American registry and the use of the American flag to vessels owned by our own citizens and engaged in foreign trade, unless built within the United States.

While that provision of law confers no benefit whatever upon the domestic shipbuilding industry it seriously obstructs the progress of American over-sea navigation. It has deprived the people of the United States of their proper share of the ocean carrying trade, prevented us from attaining our proper rank as a maritime power, and enhanced the strength and importance of our commercial rivals. It has compelled American citizens to place their property on the high seas under the protection of foreign flags, subjected it to the laws and regulations of foreign governments, and rendered it tributary to the wealth-producing forces of foreign nations. It rests upon a theory which all maritime nations, except the United States, have abandoned as impracticable and as a source of national weakness.

The considerable investments of American capital in transatlantic steamships, purchased abroad within the past few years, warrant the belief that the repeal of the restrictive provisions of our navigation laws will be followed by a steady and permanent increase in our registered tonnage, a larger control over the means of communication by sea between the United States and foreign nations, and an expansion of the opportunities for American labor and capital.

The opinion that our merchant marine in foreign trade can be increased by the imposition of discriminating taxes in American ports on foreign vessels or their cargoes is obviously erroneous. The attempt would be an invitation to commercial retaliation against American vessels in foreign ports which would in effect deprive them of any advantages in domestic ports that discriminating legislation might undertake to be-

stow. Discrimination on account of the flag carried by a vessel has no longer a place in an intelligent maritime policy.

I concur in the recommendation that the several marine bureaus of the Treasury Department be assembled under the direct supervision of one Assistant Secretary of the Treasury, and to carry out the recommendation I request that Congress provide for an additional Assistant Secretary of the Treasury. It is believed that such reforms in the administration of the Department will result from favorable action upon this recommendation that the creation of the new office will reduce expenditures. The Treasury Department is intrusted with the administration of laws relating to a great variety of subjects, having no necessary or practical connection with each other, and its organization must be highly specialized to enable it to respond promptly and efficiently to the public demands upon it. The proposed concentration of marine bureaus would secure substantially all the advantages which have been suggested as reasons for the creation of a new Department of Commerce or a National Marine Board, and is open to none of the manifest and conclusive objections to those two projects.

#### THE LIGHT-HOUSE SERVICE.

The Light-House Board has submitted estimates for the building of three new steam tenders to take the place of vessels about worn out, and which will be unseaworthy by the time the new ones can be made ready to take their places. These little steamers are of very great value to the Board, enabling it to quickly replace buoys or light-ships when they go adrift, to promptly furnish light-houses with supplies needed to meet an emergency, and, above all, to make frequent inspections of light-houses and light-ships, and to keep in constant force the discipline of the Service. The vessels it is proposed to replace are now so frail, from age and severe service, that they can not keep the sea in heavy weather, but are forced to seek refuge in harbor at the very times when they are most needed.

Estimates are submitted for building several light-vessels, which appear to be much needed to take the places of regular vessels brought in for repair. The Light-House Establishment is singularly lacking in relief light-vessels. This is because it has had to draw so heavily upon its reserved forces. A new light-vessel, to be stationed in the Pacific Ocean off Umatilla Reef, near the entrance to the Straits of San Juan de Fuca, is very much needed.

Attention is invited to the urgent necessity for more liberal appropriations to maintain the Light-House Establishment. Congress makes appropriations at each session for increasing the number of light-stations, but it does not increase, in like ratio, the appropriations for supplying these stations with oil, wicks, chimneys, cleaning material, and the like; for paying the wages of the additional keepers required;

for keeping the light-stations in proper repair; and for keeping up the buoyage of the coasts. The estimates made for these purposes are based on the actual present needs of the Service, as set forth in itemized requisitions made by the light-house district officers, and the appropriations asked for will make it possible to keep the Service up to a high standard.

The Light-House Board has during the past year kept fully up with the advance of science in its line in the other countries of the world, as will be seen from the appendices submitted with its annual report, showing the condition of the unique electric-lighted buoys in New York Bay; the descriptions of the peculiar foundation built for Wolf Trap light-house in Chesapeake Bay; the curious conduits in which lights are hauled out to pierheads on the lakes; the account of the exhibit of the Light-House Establishment at the World's Columbian Exhibition, and the able and complete account of the kind, force, and use of fog signals, involving much practical discussion of mooted points in the laws of sound.

#### LIFE-SAVING SERVICE.

The past year was remarkable for the number and violence of the tempests that swept both the sea and lake coasts, some of those on the lakes surpassing in fury any previously recorded in the annals of the Weather Bureau, while several on the Atlantic have not been exceeded in ferocity during the past twenty years. The disasters occurring within the province of the Life-Saving Service were more numerous, and involved the total destruction of a greater number of vessels than in any former year since the organization of the Establishment. The skill and heroism of the men and the efficiency and adequacy of the appliances of the stations were subjected to extreme tests, and, it is gratifying to say, with results which reflect credit alike upon the organization and the country.

At the close of the year the Service embraced 247 stations, of which 182 were located on the Atlantic and Gulf coasts, 51 on the Lakes, 1 at the Falls of the Ohio, Louisville, Ky., and 13 on the Pacific. The following are the statistics of casualties occurring during the year within the field of their operations:

The number of documented vessels involved in disaster was 380, on board of which there were 4,054 persons, of whom 3,993 were saved and 61 lost. The estimated value of the property involved was \$9,890,610, of which \$7,688,170 was saved and \$2,202,440 lost. The number of vessels totally lost was 91.

There were also 214 casualties to undocumented small craft, such as sailboats, rowboats, etc., on which were 467 persons, 460 of whom were saved and 7 lost. The property involved in the latter disasters amounted to \$109,810, of which \$75,045 was saved and \$34,765 lost.

The following is the aggregate:

|                                                               |                |
|---------------------------------------------------------------|----------------|
| Total number of disasters.....                                | 594            |
| Total value of property involved.....                         | \$10, 000, 420 |
| Total value of property saved.....                            | \$7, 763, 215  |
| Total value of property lost.....                             | \$2, 237, 205  |
| Total number of persons involved.....                         | 4, 521         |
| Total number of persons lost.....                             | 68             |
| Total number of shipwrecked persons succored at stations..... | 658            |
| Total number of days' succor afforded.....                    | 1, 501         |
| Number of vessels totally lost.....                           | 91             |

Besides those saved from vessels, 83 others were rescued, under a variety of circumstances, from the peril of drowning. The crews also rendered very valuable service in saving property, 439 vessels having been aided by them in getting afloat when stranded, repaired when damaged, piloted out of dangerous places, etc. There were 244 instances in which vessels in danger of stranding were warned off by the signals of the patrolmen and escaped disaster.

The cost of the maintenance of the Service during the year was \$1,258,221.24.

The stations mentioned in the last report as being in process of construction, one at Ashtabula, Ohio, and one between Point Lobos and Point San Pedro, California, have been completed and put in operation. Two others, one at Duluth, Minn., and one at Portsmouth, N. C., have also been completed, and are now receiving their equipments. The former will be ready for occupancy at the opening of navigation next spring, and the latter probably before the 1st of January. A station, authorized to be established on Seven-Mile Beach, New Jersey, is under construction and approaching completion. Two stations have been rebuilt during the year, one at Cahoons Hollow, on Cape Cod, Massachusetts, to replace the one destroyed by fire February 25, 1893, and one at Spermaceti Cove, near Sandy Hook, New Jersey, to take the place of an old station built many years ago, which stood within the range of the heavy guns on the proving grounds of the Ordnance Department, U. S. Army, and was not worth removing.

The Government improvements to the approaches of Charleston Harbor having diverted the main ship channel from the vicinity of Morris Island on the south side to that of Sullivans Island on the north, thus leaving the Morris Island Life-Saving Station too remote to render prompt assistance to vessels meeting with accident in entering or leaving the harbor, Congress, by act of March 14, 1894, authorized the Secretary of the Treasury to transfer the life-saving station to Sullivans Island, with permission to cause the present station buildings to be removed to the new locality or new buildings to be erected, as should appear for the best interests of the Government. Examination showing that the transfer of the buildings and their proper establishment on the new site would involve an expense in excess of their value, the construction

of a new station upon a site donated by the town of Moultrieville was authorized, and the station is nearly ready for occupancy.

The coast telephone service has been somewhat further extended and improved. By means of this ready method of communication between stations, and with neighboring seaports, several life-saving crews are easily assembled on critical occasions, and tugs and other aids to the shipwrecked promptly advised when their services are needed. During the past year the lines have, in many important instances, demonstrated their almost incalculable value as an aid to expeditious and efficient life-saving operations. This feature of the Service has attracted much attention in foreign countries, especially in Great Britain, finally resulting in a visit by the agent of a royal commission, who personally examined the working of the system at our stations, and in his report highly commended it, and recommended its adoption in his own country.

The report of the General Superintendent calls attention to the discrimination made in the pay of the surfmen by the act of August 3, 1894, extending the period during which the stations are to be manned upon the Atlantic and Gulf coasts, the result of which is that the difference of a single day in the period of the employment of two men produces a difference of \$38 in favor of the man who serves the shorter period, although they perform precisely the same duties and are subject to the same perils and discipline. He also points out some difficulties that attend the execution of the law. The establishment of a fair and uniform rate of compensation for the surfmen throughout the Service would obviate the difficulties and dispel the discontent among the crews which the present condition engenders, and I would respectfully recommend appropriate legislation to this end.

#### STEAMBOAT INSPECTION SERVICE.

The Supervising Inspector-General reports the inspection, during the year, of 7,762 domestic steam vessels, with a net tonnage of 1,595,785.27. The officers licensed numbered 38,680. The number of foreign passenger steamers inspected was 283; net tonnage, 500,807.08. It is estimated that between 600,000 and 700,000,000 passengers were carried during the year.

The number of lives lost was 225, being an increase of 27 over that of the previous year. Of the number of lives lost 96 were passengers and 159 were officers or persons employed on the steamers.

The personnel of the Service at the end of the fiscal year consisted of 161 officers, clerks, and messengers, exclusive of two vacancies existing at close of year by reason of the decease of two local inspectors. The expenses of the foreign inspection service were only \$361.08, out of an authorized expenditure of \$46,000, showing a saving of \$45,638.92, which was accomplished by an order transferring to the officers of the domestic service, under appointments designating them as "*acting special inspectors of foreign steam vessels*," the work formerly done by the

officers previously appointed specially for that purpose, whose duties as such were scarcely more than nominal, and the positions held by them being virtually sinecures.

Attention is called to the recommendations of the Supervising Inspector General, relating to amendments to the steamboat inspection laws, which are commended to Congress for its consideration.

#### COAST AND GEODETIC SURVEY.

The Superintendent of the Coast and Geodetic Survey presents in his annual report statements exhibiting the general scope of the operations of that service, followed by summaries of what has been accomplished in the several branches of field and office work during the fiscal year. In the maps of general progress, which are to accompany the report at the date of its transmission to Congress, the advance made is shown graphically.

The work of the Survey has included the measurement of base lines; reconnoissance, and triangulation; determination of time, latitude, longitude, and azimuth; observations for the force of gravity; determination of the variations of latitude; geodetic leveling; observations for magnetic declination, dip, and intensity; topographical surveys; hydrographic work, involving inshore and offshore soundings and observations of tides and currents. Among operations of importance begun, continued, or completed during the year, the following may be here mentioned: Action taken by the Superintendent as Commissioner on the part of the United States, conjointly with the Commissioner of the Dominion of Canada, to determine upon a method of defining with greater accuracy the boundary line between the two countries in the waters of Passamaquoddy Bay; completion of the hydrographic survey of the Northeastern Boundary Lakes; approach towards completion of the resurvey of Boston Bay and Harbor, and completion of the topographical resurvey of the Connecticut River; surveys made in compliance with a request from the State of Virginia for defining the limits of the natural oyster beds in the waters of that State; survey of the Outer Diamond Shoal off Cape Hatteras for the use of the Light-House Board; advance toward completion of the resurveys of Pensacola Bay and its tributaries; limiting lines of the natural oyster beds in Mobile Bay, determined for the U. S. Commissioner of Fish and Fisheries; reconnoissance and triangulation along the Rio Grande, continued towards the Gulf of Mexico with a view ultimately to the location of that part of the United States and Mexican boundary line; cooperation with the Navy Department in the speed trial of the new cruiser *Olympia* over the trial course laid out by the Survey in the Santa Barbara Channel; progress made in the resurvey and remarking, as provided for in act of Congress, of that part of the boundary line between the States of California and Nevada, extending from a point in Lake Tahoe to the Colorado River; development of the inshore hydrography of San Francisco

entrance; advance towards completion of the survey of the Strait of San Juan de Fuca, and surveys in southeastern Alaska, carried on in cooperation with officers of the Dominion of Canada for the location of the boundary line between Alaska and British Columbia, as provided for in the treaty of 1892, between the Governments of the United States and Great Britain.

The assignments of two of the officers of the Survey to special duty by appointment of the President are still in force; one is serving as a member of the Mississippi River Commission and the other as a member of the International Boundary Commission, organized for the location of that part of the United States and Mexican boundary line extending from the Rio Grande to the Pacific.

More than 51,000 copies of charts were issued during the fiscal year, and the demand for them and for Coast Pilots and Tide Tables has been steadily maintained.

The exhibit of the Survey at the World's Columbian Exposition, reference to which was made in my last annual report, received the following awards, announcements of which were communicated to the Superintendent after the close of the Exposition by the chairman of the Executive Committee on Awards:

1. For the collective exhibit of charts, maps, models, instruments, and publications.

2. For the charts of the Survey, which are probably the most perfect ever produced.

3. For a number of improvements in the construction of theodolites, levels, and other instruments of precision. For a large collection of geodetic instruments of the highest degree of excellence, many of which were improved by members of the corps, and made in the shops of the Survey.

4. For important improvements in pendulums for gravity work, namely: the transfer of the knife edges to the supports, whereby they can be polished or sharpened without affecting the pendulum; for the means of determining the period by the principle of coincidences, for the consequent reduction of size and weight, facilitating transportation and manipulation.

5. For the instructive object lesson presented in the model of the United States, including Alaska, by which the true curvature of the earth is clearly shown, and the relation of heights and distances by the employment of but one scale. It exhibits in an ingenious manner the direction of the magnetic meridians, and also the principal triangulation of the United States, and the positions of the base lines.

6. For various ingenious devices for securing the greatest possible accuracy in the measurement of bases, and for determining the errors incidental thereto. For carefully engraved charts, a collection of the annual reports of great interest and importance, and complete sets of Tide Tables and Coast Pilots.

7. For evidence of the fine construction and precision of the standards of length, weight, and volume, constructed in the shops of the Bureau ; and for the representatives of the international meter and the British imperial yard.

*Office of Standard Weights and Measures.*

The preparation of five sets of weights and measures intended for the States that had not yet received them occupied the major portion of the year. The standards for North and South Dakota, begun last year, are almost ready to be delivered, only requiring the final comparison of the weights and length measures.

In addition to the above State work, the usual number of comparisons of weights and measures with the standards of the United States have been made for colleges, surveyors, manufacturers, and others.

A bulletin, approved by the Secretary of the Treasury, was issued in December, 1893, by the Superintendent of Standard Weights and Measures, announcing the formal adoption, by that office, of the names and values of units of electrical measure, as defined by the International Congress of Electricians of 1893.

PUBLIC BUILDINGS.

During the past year work has been prosecuted on 68 buildings including extensions and repairs specifically appropriated for, of which number 10 buildings have been completed for occupation, thus placing under the control of the construction branch of this Department 371 buildings, classified as follows :

|                                                                                       |       |
|---------------------------------------------------------------------------------------|-------|
| Completed and occupied.....                                                           | 283   |
| In course of construction, repairs, and modifications specially appropriated for..... | 58    |
| Active operations not yet commenced.....                                              | 30    |
|                                                                                       | <hr/> |
|                                                                                       | 371   |

The following statement shows the amount expended on public buildings during the year ending September 30, 1894 :

|                                                        |                   |
|--------------------------------------------------------|-------------------|
| For sites and construction of new buildings.....       | \$3, 075, 895. 25 |
| For repairs and preservation of public buildings.....  | 195, 900. 14      |
| For heating apparatus for public buildings.....        | 122, 822. 52      |
| For vaults, safes, and locks for public buildings..... | 50, 632. 03       |
| For photographic duplication of plans.....             | 1, 661. 86        |
|                                                        | <hr/>             |
|                                                        | 3, 446, 911. 80   |

The amount of work imposed upon the office of the Supervising Architect would seem to demand that the allowance made for the required technical service should be increased in order that the public buildings authorized by Congress may be erected with greater promptness, and this has been given consideration in the preparation of estimates to be submitted for the coming fiscal year.

Experience convinced me that a substantial reorganization of this office was necessary in order that the several kinds of work allotted to it might be so separated as to secure a greater degree of harmony and efficiency in its administration, prevent duplications of labor, and thus reduce the expenditures in certain branches of the Service; and, accordingly, such reorganization has been recently made. It has been done upon a basis which will enable the Department, without supplementary legislation, to carry into effect the provisions of the bill (H. R. 7470) now pending, with reference to securing competitive designs and plans for public buildings erected under the authority of the Secretary of the Treasury, and the passage of that measure is again respectfully recommended.

## DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1894 were \$5,742,369.57. The net revenues deposited in the Treasury on this account, for the same period, were \$3,745,422.83.

The bonded debt has been reduced during the fiscal year \$391,200, and the annual interest charge \$14,617. On July 1, 1878, when the duties of the late sinking fund commissioners of the District devolved upon the Treasurer of the United States, the debt of the District amounted to \$22,106,650. Under the provisions of the act of June 16, 1880, the Treasurer has issued \$1,033,050 of 3.65 per cent bonds in redemption of board of audit certificates and in payment of judgments of the Court of Claims. The operations of the sinking fund, however, served to prevent any material increase of the debt, which reached its maximum \$22,144,500, on January 1, 1881. There has been a steady decrease since that date, the debt on July 1, 1894, being \$18,184,200, showing a net reduction since July 1, 1878, of \$3,922,450. The annual interest charge has been reduced during the same period \$319,961.72. The ten-year 3.50 per cent funding bonds of the District are now subject to call, and during the current fiscal year the debt will be further decreased at least \$600,000.

Detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, *ex officio* Commissioner of the sinking fund of the District.

## TERRITORY OF ALASKA.

In view of the many important questions under the jurisdiction of the Treasury Department which have arisen in Alaska, especially those relating to the taking of fur seals, the salmon fisheries, and the revenue laws, I determined to have a careful investigation made with a view of making definite recommendations to Congress as to necessary changes in the laws. To this end Assistant Secretary of the Treasury Charles S. Hamlin was directed to proceed to Alaska and make a careful investiga-

tion and report upon these and other important matters. The U. S. revenue Steamer *Rush*, under the command of Capt. C. L. Hooper, was placed at his disposal, and, accompanied by Mr. Joseph W. Murray, inspector of salmon fisheries, he visited the different ports of Alaska and made a careful investigation. Although not at this time ready to transmit his report to Congress, certain conclusions drawn from it, and other reports, and certain recommendations of my own, I feel it to be my duty to present at this time.

*The Pribylof [seal] Islands.*

The Department is in possession of reports indicating a marked decrease in the number of seals on the Pribylof Islands. Although the limit was fixed for the past season at seventy-five hundred, yet authority was given to take an additional number, not exceeding twenty thousand in all, provided, in the opinion of the agent in charge, the condition of the herd would warrant it. It was found, however, impossible to secure the maximum number, fifteen thousand being all that could safely be taken; the fact that even this number was secured was because under the *modus vivendi* of 1892 and 1893 seals were spared which could be killed safely this season. For the ensuing year the limit will have to be fixed lower than the past season in view of such decrease.

Concurrently with this falling off on the islands there has been for some years a great increase in the number of seals killed at sea. While the official returns can not yet be stated it is known that the total catch in the North Pacific and Bering Sea for the season just expired is by far the largest ever known in the history of pelagic sealing. The decrease in the seals on the Pribylof Islands, coupled with the large number of dead pups found on the islands during the last season, whose mothers presumably were killed at sea, and the further phenomenal increase in the pelagic catch, justifies the belief that before the expiration of five years—when the regulations enacted by the tribunal of arbitration are to be submitted to our Government and that of Great Britain for a new examination to consider possible modifications in the light of past experience—the fur seal will have been practically exterminated.

Under these circumstances it is to be regretted that the suggestion contained in the second declaration of the tribunal of arbitration approved by M. De Courcel, and the American arbitrators, that we should endeavor to “come to an understanding with the British Government, in order to prohibit any killing of fur seals either on land or sea for a period of two or three years, or at least one year, subject to such exceptions as the two Governments might think proper to admit of,” can not be immediately adopted.

*Salmon fisheries.*

It would further appear that the salmon are rapidly decreasing in Alaska because of incessant and indiscriminate fishing and the illegal

use of implements, such as nets, weirs, etc., constituting an obstruction of the streams, and I recommend that this be prohibited for at least two days of each week, and that authority be given to Government officials to destroy all obstructions placed in the streams.

The canning of salmon has become a very important Alaskan industry, furnishing employment to many people. The industry contributes nothing, however, to the wealth of the Territory, as the natives are but rarely employed, and the fishermen and laborers in the canneries, largely Chinese, are brought from California at the beginning of the season, returning at the close of the year. I recommend that a moderate tax be imposed upon each case of salmon canned, in order that some part of the expense of maintaining the Territory may be borne by those who take from it annually such a rich harvest, contributing to it nothing in return.

*Customs Service.*

In spite of the most earnest efforts of customs officers, the smuggling of liquor into Alaska and its illegal sale to whites and natives still continue flagrantly and defiantly. In view of the vast area of the Territory—being about one-sixth part of the whole United States—and in view of its thousands of miles of coast line, it is, perhaps, not surprising that such practices have not yet been thoroughly broken up. Complaint is also made that it is almost impossible to secure conviction by jury trial because of sympathy with the accused, and the suggestion has been made that the United States district judge be empowered to select the jury in prosecutions for violation of liquor laws.

It seems to be the almost unanimous feeling of the people of Alaska that a system of high license be adopted as the most desirable change from the existing practice. It is my purpose, however, to enforce vigorously and rigorously the existing prohibition of the importation of liquor, and it has, therefore, been determined to station a revenue cutter permanently in Alaska for this purpose.

The growth of population in Alaska is steady and the amount of money invested in the Territory increases yearly. It is believed that a large immigration will set in as soon as Congress shall extend over the Territory the general land laws or some other system of laws enabling the settler to acquire private ownership in land, a privilege now accorded only to the occupiers of town sites and to the owners of mines, canneries, and persons engaged in trade and manufacture.

I recommend that power be given to the Secretary of the Treasury to establish additional subports of entry and delivery throughout the Territory of Alaska wherever and whenever in his judgment such ports are necessary and to appoint such additional officers as such increase in ports demands.

Other important recommendations and details regarding needed legislation in Alaska are reserved for a further communication.

## THE NEW ACCOUNTING SYSTEM.

The legislative, executive, and judicial appropriation act of July 31, 1894, provided for a radical change, to take effect October 1, in the accounting system of the Government. The offices of the Second Comptroller of the Treasury and the Commissioner of Customs were abolished and the First Comptroller made the sole Comptroller of the Treasury. The jurisdiction of the six Auditors is so arranged that each Auditor settles the accounts of one Department, excepting in the case of the former Fifth Auditor, who now settles the accounts of the Department of State, Justice, and Agriculture and other establishments and bureaus not under any of the Executive Departments, and accounts not assigned to the other Auditors. The Auditors being designated as the Auditors for the respective Departments tends to simplify the question of the jurisdiction of accounts, and at the same time makes it more convenient for the officers of the Government and the public having business with the accounting offices.

The detail revision of accounts, heretofore the work of the Comptrollers' offices, is abolished, and the settlements of the Auditors are final and conclusive upon the executive branch of the Government, unless an appeal is taken to the Comptroller of the Treasury by the claimant, the head of the Department interested, or the Comptroller. In such case the Comptroller's revision is final. The change was promptly effected on October 1, and notwithstanding the reduction of force in the accounting offices, it is believed that the settlement of accounts will be expedited, and that the danger of mistakes or loss to the Government will not be increased.

## FREE ALCOHOL IN THE ARTS.

Owing to defects in the legislation the Treasury Department has been unable to execute the provisions of section sixty-one of the act of August 28, 1894, permitting the use of alcohol in the arts, or in any medicinal or other like compound, without the payment of the internal tax. The act made no appropriation to defray the expenses of its administration, or for the repayment of taxes provided for; and, after full consideration of the subject and an unsuccessful attempt to frame regulations which would, without official supervision, protect the Government and the manufacturers, the Department was constrained to abandon the effort and await the further action of Congress.

It is estimated in the office of the Commissioner of Internal Revenue that the drawbacks or repayments provided for in the act will amount to not less than \$10,000,000 per annum, and that the expense of the necessary official supervision will not be less than \$500,000 per annum. For the information of Congress, the correspondence between the Secretary and the Commissioner of Internal Revenue upon this subject will accompany this report.\*

\*NOTE.—Since the preparation of this report a communication, based on recently acquired information, has been received from the Commissioner in which he estimates this expense at not less than \$1,000,000. See his letter of January 9, 1895, Appendix, page 991.

## APPROPRIATION LAWS.

The Comptroller of the Treasury calls attention in his report to the difficulties attending the administration of the appropriation acts passed by Congress, on account of the doubts which frequently arise as to the intention of that body concerning the time during which the money appropriated shall be available. There appears to have been heretofore no authoritative or consistent rule upon this subject sufficiently explicit to afford a guide in all cases, and, consequently, the practice has varied under different administrations of the Treasury Department and has not always been uniform under any one of them. The general policy now is to construe all appropriations as annual unless a contrary intention is expressed in the act, or it clearly appears from the character of the object or service appropriated for that Congress must have intended the money to be available until the object was fully accomplished or the service fully completed. But the application of this rule is very difficult in many cases, and I, therefore, concur in the recommendation of the Comptroller that Congress shall hereafter clearly indicate in each act those appropriations which are intended to be available until expended, thus removing all doubt upon the subject.

## CONDITION OF THE TREASURY—CURRENCY REFORM.

On the 1st day of July last the total cash in the Treasury, excluding current liabilities, but including a gold reserve of \$64,873,024, was \$116,626,221; and on the 1st day of November, the total cash, excluding current liabilities, but including \$61,361,826 in gold, was \$106,992,734, showing a decrease of \$9,633,487. The excess of expenditures over receipts during the last fiscal year was \$69,803,260, and during the first five months of the present fiscal year, \$21,737,367.92. It is not believed, however, that this difference between the receipts and expenditures will continue in the same proportion until the close of the year, and, accordingly, I have estimated a deficiency of \$20,000,000 at that time. Owing to the large importations of raw sugar in anticipation of the passage of the tariff act of August 28, 1894, the duties collected upon that article up to December 1st amounted to only \$3,022,000, and, of course nothing has yet been realized from the tax on incomes, as its payment can not be legally enforced until after July 1, 1895. But there is reason to believe that the importations of sugar must be resumed at an early date and continued upon a scale which will yield a large revenue from that source during the remainder of the year, and it is probable, also, that on account of the penalties which may be incurred for nonpayment within ten days after July 1, a considerable part of the income tax will be realized in time to be available. As the reduced rates of duty on manufactures of wool will take effect on January 1, 1895, the importations of that class of goods will doubtless be greatly increased after that date, and, consequently, a considerable addition to the revenue may be reasonably anticipated from that source. If these expectations should be to any

considerable extent disappointed, the year will close with a greater deficiency than has been estimated.

My opinion is that the laws now in force will yield an ample revenue for the fiscal year 1896, as all their provisions will then be operative, and the prospective improvement in the business of the country, if realized, will greatly increase the resources from which taxes are collected, and, accordingly, a surplus of \$28,814,920 is estimated for that year.

In my last annual report I called attention to the unsatisfactory condition of our financial legislation, and especially to the issue and redemption of circulating notes by the Government, and the inability of the Secretary of the Treasury, under existing laws, to make prompt and adequate provision for the support of the public credit. The experience of the past year has confirmed and strengthened the opinions then expressed, and I therefore respectfully but most earnestly urge upon Congress the necessity for remedial legislation during its present session. The well-known defects in our financial system and the serious nature of the evils threatened by them have done more during the last two years to impair the credit of the Government and the people of the United States, at home and abroad, and to check our industrial and commercial progress than all other things combined, and our first and plainest duty is to provide, if possible, some effective method for the prompt and permanent relief of the country from the consequences of the present unwise policy. A brief statement of the practical and unavoidable results of the existing legislation will demonstrate its injurious effects upon our financial affairs more clearly than any argument that could be submitted.

After many fluctuations, the gold reserve held for the redemption of United States legal-tender notes was reduced on the 17th day of January, 1894, to the sum of \$69,757,824, and the cash balance in the Treasury, excluding the current liabilities, but including the gold reserve and subsidiary and minor coin, was \$83,961,402. The current ordinary expenses for the support of the Government were, and for some time had been, very considerably in excess of the current receipts, and, consequently, it was impossible to procure gold for the reserve without resorting to the issue and sale of bonds, under the authority conferred by the act of January 14, 1875, commonly known as the Resumption Act. Accordingly, bonds to the amount of \$50,000,000, bearing interest at the rate of five per centum, and payable after ten years from date, being one of the three classes of bonds authorized by the act referred to, were issued and sold for the sum of \$58,660,917.63, no bid having been accepted which would yield the purchaser more than three per centum upon his investment. On the 6th day of March, 1894, the free gold in the Treasury amounted to the sum of \$107,446,802, which was the highest point that has been reached since March 25, 1893. The lowest point reached by the reserve since the resumption of specie payments was on the 7th day of August, 1894, when, by reason

of withdrawals in the redemption of notes, it was reduced to \$52,189,500. After that date it was slowly replenished by voluntary exchanges of gold coin for United States notes by the banks, and by small receipts of gold in the payment of dues to the Government, until the 14th day of November, 1894, when it reached the sum of \$61,878,374.

In the meantime, however, the frequent presentation of notes for redemption in gold by individuals and institutions not desiring it for export, clearly indicated the existence of a feeling of uneasiness in the public mind, while foreign exchange was almost constantly at or near a rate which made it more profitable to export gold than to purchase bills, and, consequently, withdrawals for shipment were daily threatened. In addition to these causes of anxiety, the vast accumulation of money at our financial centers and the general depression in business which prevailed in this country, had so reduced the rates of discount that the inducement to keep funds abroad where better investments could be made were much greater than in ordinary times, and this, together with the other facts stated, made it highly imprudent to neglect any precaution which appeared necessary to insure the safety of our financial position. In fact, some shipments of gold were actually made, and, as the season was approaching when in the usual course of trade and financial operations large exportations nearly always occur, it was considered absolutely necessary for the maintenance of the public credit and the continued execution of the monetary policy declared by Congress in the act of July 14, 1890, and repeated in the act of November 1, 1893, to resort again to the issue of bonds. With a current revenue inadequate to defray the ordinary current expenses, and practically no receipts of gold from customs or other sources, it was evident that the Treasury would be unable to meet even the usual demands for export, which, however, would probably be very much augmented by the increased apprehension produced by the depleted condition of the reserve. Heretofore, when redemptions have been demanded to any considerable amount they have commenced at a time when the reserve was sufficiently large to sustain the loss without seriously endangering the credit of the Government, or impairing the soundness of the currency; but with a reserve of only \$61,878,374 to begin with, it would not have been possible at any time heretofore, and in my opinion would not be possible hereafter, to meet the obligations of the Government in the manner plainly required by the letter and spirit of the statutes enacted by Congress upon the subject.

This was the condition of affairs when, on the 14th day of November, proposals were issued for the sale of additional United States five per cent ten-year bonds to the amount of \$50,000,000, reserving in the official announcement the right to reject any or all bids, and requiring the payment of twenty per cent in gold coin, or gold certificates, at the time of

the acceptance of each bid, and twenty per cent at the end of each ten days thereafter, but giving purchasers the option to pay the whole amount at once, or at the maturity of any one of the intervening installments. The result of this proposition was that four hundred and eighty-six bids were received, amounting to \$178,836,050, nearly all of which were at rates which would yield to the investor three per cent, or less, upon the sums proposed to be paid. One bid for the whole sum of \$50,000,000, upon the basis of 2.878 per cent, and being the most advantageous offer for the Government that was made, either singly or by aggregating the separate bids, was accepted, and the proceeds of the sale, \$58,538,500, have nearly all been paid into the Treasury according to the terms of the sale.

This transaction justifies the opinion that a two and one-half per cent bond, having a reasonable time to run, could probably have been sold at par, and certainly that a three per cent bond could have been disposed of at or above that rate. The fact that a bond bears so high a rate of interest and has so long a time to run that it must be sold at a large premium, deters many from offering to purchase and detracts considerably from its investment and speculative value in the hands of the comparatively few who are willing to take the risk of future fluctuations in its price. The consequence is that the purchases are made almost exclusively by large moneyed institutions and capitalists who are familiar with such securities, and the people generally are precluded from investing their savings in the only form which is known to be perfectly good and always convertible into money. As the authority to issue and sell bonds already exists, and the present state of our financial legislation compels its occasional exercise, I repeat the recommendation made in my last annual report that, in the interest of the Government and people, power be conferred upon the Secretary of the Treasury to negotiate loans at a lower rate of interest and for a shorter time than are now allowed. The existence of such authority, instead of increasing the probabilities of a frequent resort to that means of raising money, would have the contrary effect, because, when it is known that the Secretary of the Treasury is clothed with ample power and facilities to procure means for the maintenance of the reserve, public confidence in the ability of the Government to meet promptly all demands upon it will be much stronger than under present circumstances. Besides, the policy of limiting the Government to the sale of an antiquated bond, bearing a rate of interest wholly inconsistent with the existing state of the public credit and having a longer time to run than is apparently necessary at the date of its issue, can not be justified upon any grounds of expediency or principle. The only bonds which the Government now has authority to issue for any purpose are described in the Refunding Act of July 14, 1870, passed nearly a quarter of a century ago, and since then the credit and resources of the country have so greatly im-

proved that the fiscal legislation of that period is wholly unsuited to the present situation.

The law should be so amended as to conform to the conditions and requirements of the public credit and service at the present time, and I earnestly hope that Congress will take early and favorable action upon the subject.

Had there been no statute or public policy requiring the Government to redeem in coin and reissue its own notes and to maintain the parity of two kinds of coin of unequal intrinsic value, there would never have been a time since the close of the war when the funds in the Treasury were not ample for all other purposes, and no issue of bonds could, therefore, have been necessary. But while the statutes referred to remain in force, and so long as there are in circulation under the authority of the Government two coins unequal in value, but equal in legal-tender qualities, every consideration of good faith and sound policy requires the prompt redemption of the notes on presentation in the kind of coin demanded by the holder, and the constant observance of such administrative methods as may be necessary to preserve the purchasing power of the less valuable metal. This is essential to the continued circulation of our standard silver dollars and their paper representatives at par, and to abandon this policy, without substituting a better one in its place, would not only fail to cure many of the evils now existing, but would entail upon the people of the country additional and greater ones.

If, however, the mandatory legislation which keeps a large volume of Government notes in circulation, notwithstanding their repeated redemptions in coin, and also imposes upon the Government an obligation to maintain the parity of the two metals in respect to their purchasing and debt-paying power, is perpetuated, it is evident that the Treasury must remain in a position which will compel it to procure and furnish gold to all who demand it, whether they be our own citizens or citizens or subjects of other countries. At the same time it will have no lawful or regular means of obtaining gold, except by the issue and sale of bonds, thus periodically increasing the interest-bearing public debt without either making permanent additions to its stock of this metal, or diminishing to any extent its obligations on account of the notes redeemed. This situation is the necessary result of three features of our currency legislation, and it can not be permanently avoided, or even temporarily improved, without material changes in our laws relating to that subject. These features are:

- (1) The circulation of United States notes as currency and their current redemption in coin on demand.
- (2) The compulsory reissue of such notes after redemption.
- (3) The excessive accumulation and coinage of silver and the issue of notes and certificates against it upon a ratio which greatly overvalues that metal as compared with the standard unit of value in this and the other principal commercial countries.

These features are the most prominent characteristics of our financial code and they constitute a monetary system unlike that of any other enlightened government in the world. One of their most obvious effects is to defeat all attempts of the Treasury Department to procure and keep constantly on hand a sufficient amount of gold to inspire entire confidence at home and abroad in the ability of the Government to preserve its own credit and maintain a sound currency for the use of the people. Frequent issues of bonds for the purpose of procuring gold, which can not be kept after it has been obtained, will certainly cause increased distrust among our own people as well as among the people of other countries, and not only swell the volume of our securities returning from abroad for sale or redemption, but increase the withdrawals of foreign capital heretofore invested in our domestic enterprises; and it must be admitted by all, no matter what opinions they may entertain upon current questions of finance, that such a condition of affairs can not permanently continue without still more serious consequences to the material interests of all our citizens than have heretofore been experienced.

The result of all our commercial and financial transactions with the people of other countries has been to keep us almost constantly in the position of debtors, and, generally, to a very large amount. The prosperity of our people, therefore, depends largely upon their ability to sell their surplus products in foreign markets at remunerative prices in order to secure money or establish credit abroad with which to pay interest and dividends upon loans and other investments which our customers there have made here. Ordinarily, when there is no distrust of our currency, or other discouraging influence, a considerable part of the interest and dividends earned by foreign capital in this country is annually or semiannually reinvested here, and this, together with the fact that under normal conditions the balance of trade is in our favor, enables our people to meet their obligations abroad without reducing their stock of money at home. But, when distrust arises, either as to our ability to pay, or as to the value of the money with which we intend to pay, the foreign capitalist not only ceases to reinvest but proceeds to withdraw all his money by disposing of his American securities in order to protect both capital and income against threatened depreciation. There are but two ways in which this withdrawal can be effected; one is for our people to export and sell their commodities in foreign markets to a sufficient amount to create a balance of credit in their favor equal to the amount to be withdrawn, and the other is to ship gold, that being the only money recognized in the settlement of international balances. The extent to which these withdrawals have occurred during the last two years, and the manner in which they have been accomplished, are partially shown by the facts that, although our exports of merchandise, including silver bullion, exceeded our imports during the fiscal year 1893 to the amount of \$36,279,795, the net export

of gold was \$86,897,275, while during the fiscal year 1894 the net export of that metal was \$4,172,665, notwithstanding the balance in our favor on account of merchandise and silver bullion sold abroad amounted to \$264,314,663. It thus appears that our people were compelled to pay abroad in merchandise and gold during the time named at least \$391,600,000 more than they received back, and this vast sum has been abstracted largely from the active business enterprises of the country, so affecting their growth and prosperity as to limit consumption, reduce prices and discourage productive industry.

But, independently of these considerations, our own people have a clear right to demand a sound and stable currency for use in the transaction of their business at home, while their purely commercial relations with the people of other countries, upon whom the producers of exportable commodities are compelled to rely for the consumption of their surplus, can not be profitably maintained unless they are always in a condition to pay for what they buy in as good money as they receive for what they sell. We can not, therefore, preserve our trade relations with the best customers for our surplus products unless we maintain a monetary system substantially in accord with theirs; and until they manifest a disposition to cooperate with us in effecting a change upon terms just and fair to all our interests, we ought to continue our adhesion to the gold standard of value with as large a use of silver as is consistent with the strict maintenance of that policy. But, in order to insure the success of such a policy, it is necessary not only that the Government should be at all times prepared to redeem its direct obligations in the standard unit of value and preserve equality in the exchangeable value of all its legal-tender coins, but that its ability and determination to discharge this duty shall be so manifest as to command the entire confidence of the public.

Since the resumption of specie payments, on the first day of January, 1879, United States legal-tender notes, and Treasury notes issued under the act of July 14, 1890, have been redeemed in gold to the amount of \$260,000,000 and all the notes so redeemed have been reissued and are now outstanding. They are a constant menace to the gold reserve, and no scheme of financial reform can be complete or effectual which does not provide at least for their gradual elimination from our currency system. To retain them as a part of the currency of the people and refuse to redeem them in standard coin on demand, would be repudiation in its most odious form, because the larger part of these notes were forced into the circulation by the Government at a time and under circumstances which justified the most implicit reliance upon its good faith. On the other hand, to continue their redemption and reissue under present conditions endangers the entire volume of our currency, discredits the obligations of the Government and people, increases the public debt, and seriously embarrasses the administration of our financial affairs.

While no proposition should be entertained that will have a tendency to degrade the currency, or in any degree impair public confidence in its safety, I am convinced that the interests of the country require such changes in our legislation as will disconnect the Government entirely from the business of issuing or reissuing circulating notes, and thus relieve its fiscal department from the periodical demands upon its resources which under the existing system must continue to disturb the financial and general business affairs of the people. In proposing such changes no consideration should be ignored which affects the industrial or commercial interests of any part of the country, for all the people are alike concerned in whatever promotes or retards the healthy development of our great national resources.

It is not the capitalist alone whose interests are affected by the use, or threatened use, of a depreciated and fluctuating currency, and the consequent derangement and diminution of business. A paralysis of business, whatever may be its cause, strikes first the wage-earner, then the man of moderate means, and lastly the capitalist who has accumulated a surplus store of goods or money. A sound and elastic currency, capable of adjusting its volume easily and rapidly to the actual demands of legitimate business, is what the common interests of all our people require, and no argument is necessary to show that such a currency is impossible under any system of compulsory issue, or reissue, of circulating notes. Arbitrary regulation of the volume of circulation to be kept outstanding is wholly inconsistent with the maintenance of a healthy financial condition and is the exercise of a function which does not properly belong to the Government of the United States, or any other public authority. Its effect is to force paper currency upon the people when it is not needed, and deprive them of it when it is needed, thus establishing and maintaining an improper and unwarranted connection between the Government and the private business affairs of its citizens, and making their successful prosecution largely dependent upon the judgment or caprice of a superior authority having no interest in the transactions except, perhaps, a partisan interest not in harmony with sound fiscal arrangements.

Under our present currency system, so far as it consists of notes issued by the United States Government, the volume of circulation was intended to be, and is, in fact, unchangeable; it is unalterably fixed at a certain amount and, no matter how great the emergency may be, it can be neither enlarged nor diminished. The only part of the currency possessing in any degree the quality of elasticity is that issued by the national banking associations, and it is now generally conceded, I believe, that in this respect, at least, it has failed to meet the requirements of the situation at some of the most critical periods in the business affairs of the country. This failure is attributable, in my opinion, to three principal causes: First, the large volume of United States currency of various kinds kept constantly out-

standing, making the contraction or expansion of the comparatively small national bank circulation less effective than it would otherwise have been; secondly, the difficulty and delay in procuring, and to some extent in retiring, circulation; thirdly, and mainly, the provisions of the law which require the deposit of United States bonds to secure circulation, and restrict the issue of notes to ninety per cent of the par value of the bonds. With \$900,000,000 in United States notes, Treasury notes of 1890, silver certificates and gold certificates, besides about \$625,000,000 in gold and silver coins, constantly outstanding, none of which can be lawfully retired by the Government without substituting other currency in its place, the national bank notes, which amount to only \$207,500,000, or about twelve per cent of the whole, can not exert a very effective influence upon the volume of outstanding currency at any time, and especially at times when large contractions or expansions are most needed. But the greatest difficulties are encountered, and the national banking system, as now organized, is least effective, when the business of the country demands quick expansions of the currency to meet sudden emergencies. In the first place, in order to secure additional circulation, the banks are required, at the very time when money is most difficult to procure, to deposit United States bonds, worth in the market much more than their face value, upon which they will receive notes only to the amount of ninety per cent upon the par value of the securities; and, in the second place, under the present laws, which do not authorize the Treasury Department to prepare and hold a reserve of blank national bank notes ready for delivery immediately upon application, from thirty to sixty days must ordinarily elapse before the issue can be made, and in the meantime the emergency has probably passed. Thus, the inducement to take out circulation when business necessities are greatest is very small, if it exists at all, and even if applications are made the circulation will probably not be secured until too late to afford relief.

In addition to these obstructions to the prompt increase and decrease of circulation, the ninth section of the act of July 12, 1882, which provides for the extension of the corporate existence of national banks, expressly prohibits them from retiring their notes to a greater amount than \$3,000,000 in the aggregate per month, and enacts that no bank which has made a deposit of lawful money in order to withdraw its circulation shall be permitted to make any increase in its circulation for a period of six months thereafter. These provisions are so manifestly in conflict with the dictates of sound policy that they require no comment.

In view of the foregoing considerations, and many others that might be urged in favor of a reorganization and reformation of our paper currency system, I have prepared the outlines of a plan which, in my opinion, will relieve the Government to a great extent from the burdens now imposed upon it, secure within a reasonable time a safe and elastic national and State bank currency, and result ultimately in the perma-

nent retirement of United States legal-tender notes of both classes. It is, in brief, as follows:

## I.

Repeal all laws requiring, or authorizing, the deposit of United States bonds as security for circulation.

## II.

Permit national banks to issue notes to an amount not exceeding seventy-five per centum of their paid-up and unimpaired capital, but require each bank before receiving notes to deposit a guarantee funds consisting of United States legal-tender notes, including Treasury notes of 1890, to the amount of thirty per centum upon the circulating note, applied for. This percentage of deposits upon the circulating notes outstanding to be maintained at all times, and whenever a bank retires its circulation, in whole or in part, its guarantee fund to be returned to it in proportion to the amount of notes retired.

## III.

Retain the provision of the law making stockholders individually liable, and provide that the circulating notes shall constitute a first lien upon all the assets of the bank.

## IV.

Impose a tax of one-half of one per centum per annum, payable semi-annually, upon the average amount of notes in circulation, to defray the expenses of printing notes, official supervision, cancellation, etc.

## V.

No national bank note to be of less denomination than ten dollars, and all notes of the same denomination to be uniform in design; but banks desiring to redeem their notes in gold may have them made payable in that coin. The Secretary of the Treasury to have authority to prepare and keep on hand ready for issue upon application a reserve of blank national bank notes for each banking association having circulation.

## VI.

Require each national banking association to redeem its notes at its own office, or at its own office and at agencies to be designated by it.

## VII.

To provide a safety fund for the immediate redemption of the circulating notes of failed banks, impose a tax of            per centum per annum upon the average circulation of each bank until the fund amounts to five per centum of the total circulation outstanding. Require each new

bank, and each bank taking out additional circulation, to deposit its proper proportion of this fund before receiving notes. When a bank fails, its guarantee fund held on deposit to be paid into the safety fund and used in the redemption of its notes and if this fund shall be impaired by the redemption of the notes of failed national banks, and the immediately available cash assets of such banks are insufficient to reestablish the fund, it shall at once be made good by pro rata assessments upon the other banks, according to the amounts of their outstanding circulation; but there shall be a first lien upon all the assets of the failed bank, or banks to reimburse the contributing banks. The safety fund may be invested in outstanding United States bonds having the longest time to run, the bonds and the interest upon them to be held as part of the fund and sold when necessary to redeem notes of failed banks.

## VIII.

Repeal the provisions of the reorganization and extension act of July 12, 1882, imposing limitations upon the reduction and increase of national-bank circulation.

## IX.

Repeal all provisions of the law requiring banks to keep a reserve on account of deposits.

## X.

The Secretary of the Treasury may, in his discretion, use any surplus revenue of the United States in the redemption and retirement of United States legal tender notes, but such redemptions shall not in the aggregate exceed an amount equal to seventy per cent of the additional circulation taken out by national and State banks under the system herein proposed.

## XI.

Circulating notes issued by a banking corporation, duly organized under the laws of any State, and which transacts no other than a banking business, shall be exempt from taxation under the laws of the United States, when it is shown to the satisfaction of the Secretary of the Treasury and the Comptroller of the Currency—

(1) That such bank has at no time had outstanding its circulating notes in excess of seventy-five per centum of its paid-up and unimpaired capital.

(2) That its stockholders are individually liable for the redemption of its circulating notes to the full extent of their ownership of stock.

(3) That the circulating notes constitute by law a first lien upon all the assets of the bank.

(4) That the bank has at all times kept a guarantee fund in United States legal-tender notes, including Treasury notes of 1890, equal to thirty per centum of its outstanding circulating notes; and

(5) That it has promptly redeemed its notes on demand at its principal office, or at one or more of its branch offices, if it has branches.

## XII.

The Secretary of the Treasury may, under proper rules and regulations to be established by him, permit State banks to procure and use in the preparation of their notes the distinctive paper used in printing United States securities; but no State bank shall print or engrave its notes in similitude of a United States note, or certificate, or national bank note.

Whatever may be the objections to the issue and circulation of United States legal-tender paper, upon either constitutional or financial grounds, it has become so incorporated into our currency system, and constitutes so large a part of our active circulation, that it could not be suddenly withdrawn without producing, in the present state of our laws, considerable disturbance in the fiscal operations of the Government as well as the business of the people, and, therefore, the plan now suggested provides for its gradual retirement, by the use of surplus revenues hereafter received, a process which will probably require several years for its completion. As these notes can not be retired until other forms of currency to an equal amount have taken their place, there will be neither a forced contraction nor expansion of the circulation on account of the change. In the meanwhile, for the double purpose of protecting the Treasury as far as possible under the circumstances from repeated presentations of notes for redemption in gold, and establishing a safe basis for the national and State bank notes, the former are to be required to keep always on deposit and the latter to keep constantly on hand legal-tender paper to an amount equal at least to thirty per cent upon their outstanding circulation.

If all the national and State banks now in existence should take out circulation to the full amount proposed to be authorized, the guarantee fund alone would absorb about \$225,000,000 of legal-tender notes, and the national bank safety fund, when raised to its full amount of five per cent upon outstanding circulation, might be made to absorb about \$3,500,000 more.

As the plan suggested proposes to exempt the Government of the United States from all liability for the redemption of national bank notes and place the sole responsibility upon the banks themselves, a guarantee fund of not less than thirty per cent upon the outstanding circulation is regarded as a very proper and necessary feature of the system. A safety fund consisting of only five per cent upon the circulation, together with governmental liability for redemption in case the fund should at any time be insufficient, as proposed in one of the plans recently made public, would, of course, secure the note-holder, but it would pledge the faith and credit of the United States in a business in which they have no pecuniary interest whatever, and for that reason alone, if there were no others, such a system would be quite objectionable, and, in my opinion, not attainable.

In the case of the State banks this guarantee fund will constitute a permanent reserve which, together with the individual liability of stockholders and the first lien upon all the assets, will make its circulating notes entirely safe. In my opinion the imposition of a tax by the Federal Government upon the use of circulating notes, lawfully issued by State banks, is an unjustifiable, if not an unconstitutional, interference with the authority of the several States; but its validity has been judicially sustained, and as it does not appear to be practicable to repeal it absolutely at this time, it is proposed to avoid its prohibitory effect by exempting from taxation the notes of such banking institutions as may be organized and conducted under conditions which will amply protect the holders of their paper. While direct governmental supervision is not, and ought not to be provided for, the requirement that a bank in order to secure exemption from taxation must satisfy the Secretary of the Treasury and the Comptroller of the Currency that it has complied with all the conditions imposed will enable those officials to adopt such measures as may be necessary, in each case, to ascertain every material fact involved in the inquiry. The contingent liability to a heavy rate of taxation upon the whole amount of its circulating notes when paid out by itself, or by other banks, will constitute, it is believed, a sufficient incentive to secure sound and conservative management and to a great extent dispense with the necessity for such official supervision as is proposed to be retained over national banks.

It will be observed that the plan submitted proposes the repeal of all provisions of existing laws which require national banks to hold a fixed reserve against deposits, and, as this is a departure from the practice which has prevailed continuously for more than thirty years, it is proper to state, briefly, the reasons which have prompted me to make this suggestion. When the national banking system was originally authorized it was regarded by many as a doubtful experiment at best, and, accordingly, various precautionary restrictions and limitations were imposed for the security of the note-holders and depositors which practical experience has since shown to be unnecessary, and sometimes harmful. Among these are the requirements that bonds shall be deposited to secure ninety per cent of their par value in circulating notes, and that a fixed reserve, which can not be lawfully diminished, shall be held on account of deposits. The consequence of this last requirement is that when a bank stands most in need of all its resources it can not use them without violating the law. The necessity for holding a sufficient reserve against deposits is not questioned, and, in fact, the business of receiving deposits and discounting paper ought never to be conducted without it, but it should be held for actual use when the occasion arises, and not made legally inaccessible at the very time when it was theoretically supposed to be beneficial in sustaining the credit of the bank and affording relief to its customers. Under the present law, when a bank finds its reserve in danger of reduction below

the legal requirement, on account of the demands of its depositors, it is compelled at once to call in its loans, thereby increasing the distrust and aggravating the situation which a judicious use of the reserve would have relieved ; and besides, at such times, in order to protect the reserve, which is then entirely useless for all practical purposes, clearing-house certificates, various forms of time-checks and bills and other devices of doubtful legality, are habitually resorted to for the purpose of supplying circulation to take the place of lawful money lying idle in the vaults of the banks. To provide for a reserve which can not be utilized even at a time of the greatest stringency and distrust without incurring the penalties of forfeiture, affords a most striking illustration of the impolicy of legislative interference with the natural laws of trade and finance. It is not the duty or province of the Government to control or regulate the private affairs of the people, except for certain well-defined purposes, and as the custody and use of funds belonging to depositors are matters which affect only the interests of the immediate parties they should be left to their own judgment and discretion. The duty of the Government, so far as it has any duty in the premises, is simply to provide that all the currency issued under its authority is sufficiently secured to prevent its loss or depreciation in the hands of the people, who are compelled to receive and pay it out in the transaction of business ; but a bank is not dependent upon the Government for authority to receive deposits, and its use for that purpose by the public is as purely voluntary as the credit extended to any other corporation or to a private individual.

Every prudently managed bank, if left free to conduct its deposit and discount business in the manner most advantageous to its own interests and the interests of its patrons, will undoubtedly keep on hand a reasonable reserve to meet not only all the ordinary demands upon it, but to provide for such emergencies as are liable to occur in the community where it is located ; but it ought not to be prohibited by law from using such reserve for the only purposes it was designed to accomplish. The average amount of reserve held by all the national banks does not usually exceed seventeen or eighteen per cent of their deposits, while the statistics show that the State banks doing a deposit and discount business, and which are not required by law to keep a fixed reserve, have generally kept on hand in ordinary times about twenty per cent of their deposits, a fact which conduces strongly to sustain the position that a regulation upon this subject is not really necessary in order to secure the safe management of banking institutions, and, therefore, ought not to be continued.

A safety fund, consisting of five per cent upon the outstanding circulation of all the banks, to insure the prompt redemption of the notes of failed banks, is believed to be a necessary feature of any plan which proposes to dispense with the deposit of bonds and exempt the Government from liability on account of the national bank currency. That

the Government should be exempt, and the entire responsibility for the redemption of their own notes assumed by the banks, is a proposition which, for many reasons, I think, will receive the approval of the general public and ought not to be opposed by any special interest. The requirement that the banks shall pay their own obligations imposes upon them no greater hardship than is imposed by law upon every other business and financial institution in the country, and the only argument that can be plausibly urged against it, in the case of the banks, is that, as the Government has undertaken through their agency to secure a sound circulating medium, it should pledge its credit to keep it good under all circumstances. The conclusive answer to this is that the Government has discharged its whole duty in the matter when it has by its legislation provided such safeguards as will, with honest and competent management, guarantee the safety of the notes issued by its authority; and this is one of the results which the proposed plan is intended to accomplish. The deposit of thirty per cent by each bank as a guarantee fund for the redemption of its own notes, and a deposit of five per cent by all the banks in a common safety fund for the redemption of the notes of failed banks, together with a first lien upon all the assets, individual liability of stockholders, official supervision, and the power to assess all banks to supply deficiencies, constitute the effective parts of a system which will afford to the note-holder ample assurance against loss and at the same time leave a liberal margin for profit on the circulation.

One beneficial effect of requiring each bank to redeem its own notes will be the promotion of more careful and conservative management of its affairs, thus avoiding to a large extent the causes which have produced a majority of the failures heretofore. Governmental responsibility for the redemption of any part of the obligations of the banks has a strong tendency to encourage speculative adventures and careless methods, which would not otherwise be permitted by the directing officials, and is, besides, inconsistent with the policy that the banking business, like all others, should be conducted upon the credit and at the risk of the parties most directly interested in its success.

In order to provide a wider field for the active circulation of our silver coins and certificates, which now constitute about one-fifth of the entire volume of our currency, and to protect the Treasury as far as possible against the accumulation of certificates returned in payment of customs and other dues to the Government, it is proposed that no national bank note of a less denomination than ten dollars shall be issued. The bank notes under that denomination now outstanding amount to \$63,258,949, and there are also in circulation \$64,418,831 in old United States legal-tender notes in denominations less than ten dollars, \$60,193,658 in Treasury notes of 1890, and \$131,047,547 in silver certificates, making in the aggregate \$318,618,985 in small notes, or only about \$19,000,000 less than the entire issue of silver certificates.

Attention was called to this subject in my last annual report, and the opinion was then expressed that it would be good policy to retire these small notes and replace them with larger ones of like character. Such a course would not subject the people to any inconvenience in the transaction of their ordinary business, and would keep permanently outstanding a much larger amount of silver coin and certificates than has heretofore been done, thus relieving the Treasury to a considerable extent from one of the difficulties which frequently embarrass its operations. The large notes would be used generally in conducting the more important transactions of the people and in the payment of dues to the Government, so that, while no denomination would be excluded from circulation, public and private interests would be alike subserved. These changes could be made gradually as the various kinds of notes are received into the Treasury, and with very little, if any, additional expense.

The fact that our circulating medium is composed of so many different kinds of currency would seem to require the enactment of such legislation as will provide a place in which each can be safely and conveniently used, and as this can be done without discrimination against any of them, it ought not to be omitted from any plan which proposes permanent changes in the system. The policy of various other countries in this respect appears to have enabled them to avoid the difficulties encountered here in the attempt to keep the less valuable coins and their representatives in circulation, without derangement of the currency or disturbance of the public finances.

Great Britain, with \$550,000,000 in gold and only \$112,000,000 in silver, none of which is full legal tender, authorizes the issue of no note of a less denomination than five pounds, equal to \$24.33; France, Belgium and Italy, with \$976,000,000 in gold and \$518,300,000 in legal-tender silver, issue no notes of a less denomination than twenty francs; or \$3.86; Holland, with \$27,600,000 in gold and \$53,400,000 in legal-tender silver, issues no paper below twenty-five florins, equal to \$10.05, Spain, with \$40,000,000 in gold and \$126,000,000 in legal-tender silver, issues nothing below twenty-five pesetas, or \$4.72; Denmark, Sweden and Norway, with \$28,000,000 in gold and \$12,100,000 in limited legal-tender silver, have no paper under ten crowns, or \$2.68, and Austria-Hungary, with \$130,000,000 in gold and \$81,000,000 in legal-tender silver, is gradually retiring all notes under ten crowns, or \$4.04. None of these countries have any paper based exclusively upon silver, as we have, and consequently all payments made in sums less than the denominations of notes mentioned must be made in actual coin, which would not be the case here if the recommendation now made should be complied with. Our stock of full legal-tender silver coins is larger in proportion to the stock of gold than in any of the countries named, except Holland, Belgium, and Spain, and yet we continue to obstruct their circulation by the issue of small United States notes and bank notes,

which serve the purposes of the people in their daily transactions no better than the coins or certificates based upon them.

The experience of this country under the act of February 28, 1878, which limited silver certificates to denominations of ten dollars and over, and under the act of August 4, 1886, which removed that restriction, justifies the belief that the change now proposed would result in a greatly increased use of silver coins and certificates and that they would be much less likely to return to and remain in the Treasury than at present. At the time of the passage of the act last referred to, permitting the issue of silver certificates in denominations of one, two, and five dollars, standard silver dollars not represented by certificates had accumulated in the Treasury to the amount of \$93,959,880, although the total coinage up to that date was only \$235,643,286. Within four months after that date, although in the meantime the coinage was progressing at the usual rate, the amount of free silver held in the Treasury was reduced to \$71,259,568, and it continued to decrease, on account of the demand for small certificates, until it became so reduced that further issues of certificates had to be limited, practically, to the current coinage of the dollars.

#### REVENUE REFORM.

If this country is to utilize to the fullest extent the opportunities offered by its geographical position, natural resources, and the mechanical skill and commercial enterprise of its people, it must adhere steadfastly and aggressively to the revenue policy inaugurated by the present Congress at its last session. The reduction of taxation to the lowest point compatible with the collection of a revenue sufficient to maintain an efficient public service is a duty which, upon the plainest principles of justice, every Government owes to its citizens under all circumstances; but, when the taxation is imposed in such form or at such rates as to increase the cost of living and obstruct the processes of industry and trade, this duty becomes still more imperative, and a failure to discharge it when the power exists is a gross violation of the public trust and confidence.

For many years our tariff laws have been framed upon the theory that the wealth of the country could be increased by imposing taxes upon the people, and that the prosperity of our industries could be promoted by increasing the cost of production, and the result has been that the net profits of labor and capital constantly diminished until they reached a point which made further development of our resources almost impossible. But little opportunity was afforded for the extension of our manufacturing and mechanical industries or for the growth of our trade at home or abroad, and thus the farmers and other producers of the country were confronted by a situation which compelled them to receive diminished rewards for increased production.

A change was demanded by every consideration of public duty and private interest, and, although the recent legislation did not accom-

plish all that was expected or desired, it inaugurated a policy which it is hoped and believed will ultimately result in a great improvement in our industrial condition and a corresponding enlargement of our internal and international commerce. In the prosecution of this policy no temporary check or apparent diversion of the public mind to other subjects should be permitted to diminish our confidence in its final success or weaken our determination to maintain a consistent advocacy of its claims to the favorable consideration of the people. On the contrary, reverses should stimulate increased effort, and every movement hereafter made should be a step forward in the direction of freer trade and a more equal distribution of the rewards of industry.

The raw materials used in the production of commodities for the use of the people in their homes and in their various industrial pursuits should be free from taxation, in order that the burdens of labor may be lightened, the opportunities for employment increased, and the necessities of life made more abundant and less expensive. If our industries are to be profitably conducted, reduced cost of production must precede or accompany reduced prices of the finished product, and as cheap commodities increase consumption, the interests of all classes will be promoted by removing the obstructions which deny our skilled laborers and artisans access to the world's store of raw materials.

The late act, while it places upon the free list a considerable part of the most important raw materials used in our manufactures, left iron and lead ores and bituminous coal, together with several other articles of less consequence, still dutiable, thus not only failing to present a consistent system of revenue reform, but leaving some of our most valuable industries at a great disadvantage as compared with their rivals differently located. There are other defects consisting of ambiguous phraseology in some of the paragraphs, and inconsistent and excessive rates of duty in some of the schedules, a correction of which would be in harmony with a policy of progressive reform upon a basis of equal justice to producers and consumers, and would not affect the revenue to any considerable extent. Advantages should be promptly taken of every opportunity to remove all these objectionable features from the act in order that our legislation may be made to conform, as speedily as possible, to the pledges given to the people and to the demands of public sentiment on this subject.

J. G. CARLISLE,  
*Secretary of the Treasury.*

To

HON. CHARLES F. CRISP,  
*Speaker of the House of Representatives.*

| The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury                                                                                                                             | Indefinite...       | On demand...                       | None.....                 | Par.....                               | 450,000,000.00     |                 | 346,681,016.00      |

might deem expedient \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). The act of May 31, 1878 (20 Statutes, 87), provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but shall be reissued and paid out again, and kept in circulation.

## LOAN OF 1863.

The act of March 3, 1863 (12 Statutes, 709); authorized a loan of \$900,000,000, and the issue of bonds, with interest not exceeding 6 per centum per annum, and redeemable in not less than ten nor more than forty years, principal and interest payable in coin. The act of June 30, 1864 (13 Statutes, 219), repeals the above authority, except as to the \$75,000,000 of bonds already advertised for.

Bonds of this loan continued at 3½ per cent interest, and redeemable at the pleasure of the Government.

XC

REPORT OF THE SECRETARY OF THE TREASURY.

## CONSOLS OF 1868.

Acts of March 3, 1865 (13 Statutes, 463), and April 12, 1866 (14 Statutes, 317).

## THREE PER-CENT CERTIFICATES.

Acts of March 2, 1867 (14 Statutes, 553), and July 25, 1868 (15 Statutes, 183).

## FIVE PER-CENT LOAN OF 1881.

The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of, at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), to the extent necessary for the redemption of fractional currency in silver coins of the denominations of ten, twenty-five, and fifty cents of standard value.

The act of March 3, 1875 (18 Statutes, 466), directs the Secretary of the Treasury to issue bonds of the character and description set out in the act of July 14, 1870 (16 Statutes, 272), to James B. Eads, or his legal representatives, in payment at par of the warrants of the Secretary of War for the construction of jetties and auxiliary works to maintain a wide and deep channel between the South Pass of the Mississippi River and the Gulf of Mexico, unless Congress shall have previously provided for the payment of the same by the necessary appropriation of money.

The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 per cents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly.

The act of December 17, 1873 (18 Statutes, 1), authorized the issue of an equal amount of bonds of the loan of 1858, which the holders thereof may, on or before February 1, 1874, elect to exchange for the bonds of this loan.

## FOUR-PER-CENT LOAN OF 1907. (RESUMPTION.)

The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.

## CERTIFICATES OF DEPOSIT.

The act of June 8, 1872 (17 Statutes, 336), authorizes the deposit of United States notes without interest by banking associations in sums not less than \$10,000 and the issue of certificates therefor in denominations of not less than \$5,000; which certificates shall be payable on demand in United States notes, at the place where the deposits were made. It provides that the notes so deposited in the Treasury shall not be counted as a part of the legal reserve, but that the certificates issued therefor may be held and counted by the national banks as part of their legal reserve, and may be accepted in the settlement of clearing house balances at the place where the deposits therefor were made, and that the United States notes for which such certificates were issued, or other United States notes of like amount, shall be held as special deposits in the Treasury, and used only for the redemption of such certificates.

## GOLD CERTIFICATES.

The act of March 3, 1863 (12 Statutes, 711), authorizes the Secretary of the Treasury to receive deposits of gold coin and bullion in sums of not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each; the coin and bullion deposited for or representing the certificates to be retained in the Treasury for the payment of the same on demand. The certificates so issued to be received at par in payment of interest on the public debt and for duties on imports. The act of July 12, 1882 (22 Statutes, 165), provides that the Secretary of the Treasury shall suspend the issue of gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes falls below one hundred millions of dollars.

## SILVER CERTIFICATES.

The act of February 28, 1878 (20 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States in sums not less than ten dollars and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing

| The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time                                                                                                                                                                                                                                                                                                                                                                                                                               | 10 years ....      | Feb. 1, 1904....                           | 5 per cent...          | 117.223                    | \$50,000,000.00         | 50,000,000.00   | 50,000,000.00            |

in the Treasury not otherwise appropriated, and to issue, sell, dispose of at not less than par, in coin, either of the descriptions of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the Assistant Treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.

#### TREASURY NOTES OF 1890.

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy-one and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes, and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

152,584,417.00

#### NATIONAL-BANK NOTES (REDEMPTION ACCOUNT).

The act of July 14, 1890 (26 Statutes, 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption. \* \* \* and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt statement as debt of the United States bearing no interest.

\*In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

† Exclusive of gold, silver, currency certificates, and Treasury notes of 1890, held in the Treasurer's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

TABLE C.—ANALYSIS OF THE PRINCIPAL OF THE PUBLIC DEBT OF THE UNITED STATES FROM JULY 1, 1856, TO JULY 1, 1894.

| Year.          | 3 per cents.    | 3½ per cents.    | 4 per cents.    | 4½ per cents.    | 5 per cents.   | 6 per cents.     | 7½ per cents.    | Total interest-bearing debt. |

| 1894           | 1,851,240.26                       | 995,360,506.42            | 1,632,253,636.68       | 732,940,256.13               | 899,313,380.55                    | 25,394,385.60           |

NOTE 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

NOTE 3.—The temporary loan per act of July 11, 1862, is included in the 4 per cents from 1862 to 1863, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

# REPORT OF THE SECRETARY OF THE TREASURY. XCIX

TABLE D.—STATEMENT OF THE ISSUE AND REDEMPTION OF LOANS AND TREASURY NOTES (BY WARRANTS) FOR THE FISCAL YEAR ENDED JUNE 30, 1894.

|                                                                                             | Issues.                  | Redemptions.             | Excess of issues.        | Excess of redemptions.  |

NOTE.—The difference between the amount of money in the country and the amount in circulation represents the money in the Treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in the tables for the years 1873 to 1891 inclusive; since 1891 they are reported separately.

The foregoing tables present the revised figures for each of the years given.

## CXVI REPORT OF THE SECRETARY OF THE TREASURY.

TABLE I.—POPULATION, NET REVENUE, AND NET EXPENDITURES OF THE GOVERNMENT FROM 1837 TO JUNE 30, 1894, AND PER CAPITA OF THE REVENUES AND PER CAPITA OF EXPENDITURES.

| Year.           | Population. | Net revenue.    | Per capita on revenue. | Net expenses.    | Per capita on expenditures. |
|-----------------|-------------|-----------------|------------------------|------------------|-----------------------------|
| 1837            | 15,655,000  | \$24,954,153.00 | \$1.59                 | \$37,243,496.00  | \$2.38                      |
| 1838            | 16,112,000  | 26,302,562.00   | 1.63                   | 33,865,059.00    | 2.10                        |
| 1839            | 16,584,000  | 31,482,750.00   | 1.90                   | 26,899,128.00    | 1.62                        |
| 1840            | 17,069,453  | 19,480,115.00   | 1.14                   | 24,317,579.00    | 1.42                        |
| 1841            | 17,591,000  | 16,860,160.00   | .96                    | 26,565,873.00    | 1.51                        |
| 1842            | 18,132,000  | 19,976,197.00   | 1.10                   | 25,205,761.00    | 1.39                        |
| 1843 (6 months) | 18,694,000  | 8,302,702.00    | .89                    | 11,858,075.00    | 1.27                        |
| 1844            | 19,276,000  | 29,321,374.00   | 1.62                   | 22,337,571.00    | 1.16                        |
| 1845            | 19,878,000  | 29,970,106.00   | 1.51                   | 22,937,408.00    | 1.15                        |

# APPENDIX.

## REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

### REPORT OF THE TREASURER.

TREASURY DEPARTMENT,  
OFFICE OF THE TREASURER,  
*Washington, December 1, 1894.*

SIR: I have the honor to submit the annual report on the operations and condition of the Treasury.

### REVENUES AND EXPENDITURES.

The net ordinary revenues and expenditures for the fiscal years ending June 30, 1893 and 1894, were as shown in the following table:

|                                                              | 1893.            | 1894.            | Increase.    | Decrease.       |
|--------------------------------------------------------------|------------------|------------------|--------------|-----------------|
| <b>REVENUES.</b>                                             |                  |                  |              |                 |
| Customs .....                                                | \$203,355,016.73 | \$131,818,530.62 | .....        | \$71,536,486.11 |
| Internal revenue .....                                       | 161,027,623.93   | 147,111,232.81   | .....        | 13,916,391.12   |
| Sale of public lands .....                                   | 3,182,089.78     | 1,673,637.30     | .....        | 1,508,452.48    |
| Miscellaneous sources .....                                  | 18,254,898.34    | 17,118,618.52    | .....        | 1,136,279.82    |
| Total .....                                                  | 385,819,628.78   | 297,722,019.25   | .....        | 88,097,609.53   |
| <b>EXPENDITURES.</b>                                         |                  |                  |              |                 |
| Civil and miscellaneous:                                     |                  |                  |              |                 |
| Customs, light-houses, public buildings, etc. ....           | 19,398,233.00    | 20,316,268.90    | \$918,035.90 | .....           |
| Internal revenue .....                                       | 14,566,436.78    | 16,308,849.71    | 1,442,412.93 | .....           |
| Interior civil (lands, patents, etc.) ..                     | 9,751,506.22     | 8,911,054.85     | .....        | 840,451.37      |
| Treasury proper (legislative, executive, and other civil) .. | 50,507,363.69    | 49,160,804.19    | .....        | 1,346,559.50    |
| Diplomatic (foreign relations) .....                         | 1,997,042.90     | 1,702,307.31     | .....        | 294,735.59      |
| Judiciary .....                                              | 7,212,216.68     | 5,544,599.11     | .....        | 1,667,617.57    |
| War Department .....                                         | 49,641,773.47    | 54,567,929.85    | 4,926,156.38 | .....           |
| Navy Department .....                                        | 30,136,084.43    | 31,701,293.79    | 1,565,209.36 | .....           |
| Interior Department (Indians and pensions) .....             | 172,702,905.14   | 151,470,766.48   | .....        | 21,232,138.66   |
| Interest on public debt .....                                | 27,264,392.18    | 27,841,405.64    | 577,013.46   | .....           |
| Total .....                                                  | 383,477,954.49   | 367,525,279.83   | 9,428,828.03 | 25,381,502.69   |
| Net decrease .....                                           |                  |                  |              | 15,952,674.66   |
| Surplus .....                                                | 2,341,674.29     | .....            | .....        | 72,144,934.87   |
| Deficiency .....                                             |                  | 69,803,260.58    | .....        | .....           |

Classified according to the principal heads, the revenues and expenditures on account of the public debt were as given below:

|                                     | 1893.            | 1894.            | Increase.       | Decrease.     |
|-------------------------------------|------------------|------------------|-----------------|---------------|
| <b>REVENUES.</b>                    |                  |                  |                 |               |
| Certificates of deposit .....       | \$165,737,000.00 | \$208,248,000.00 | \$42,511,000.00 |               |
| United States notes .....           | 91,116,000.00    | 90,960,000.00    |                 | \$156,000.00  |
| Treasury notes of 1890 .....        | 87,238,106.00    | 51,791,190.00    |                 | 35,446,916.00 |
| National-bank notes .....           | 2,937,580.00     | 16,637,783.50    | 13,700,203.50   |               |
| Bonds .....                         | 22,900.00        | 58,647,545.71    | 58,624,645.71   |               |
| Total .....                         | 347,051,586.00   | 426,284,519.21   | 114,835,849.21  | 35,602,916.00 |
| Net increase .....                  |                  |                  | 79,232,933.21   |               |
| <b>EXPENDITURES.</b>                |                  |                  |                 |               |
| Certificates of deposit .....       | 246,906,540.00   | 182,840,290.00   |                 | 64,066,250.00 |
| United States notes .....           | 91,116,000.00    | 90,960,000.00    |                 | 156,000.00    |
| Treasury notes of 1890 .....        | 41,759,950.00    | 46,397,000.00    | 4,637,050.00    |               |
| National-bank notes .....           | 9,037,651.50     | 10,929,535.75    | 1,891,884.25    |               |
| Bonds and fractional currency ..... | 709,903.00       | 256,447.20       |                 | 453,455.80    |
| Total .....                         | 389,530,044.50   | 331,383,272.95   | 6,528,934.25    | 64,675,705.80 |
| Net increase .....                  |                  |                  |                 | 58,146,771.55 |
| Revenues over expenditures .....    |                  | 94,901,246.26    | 137,379,704.76  |               |
| Expenditures over revenues .....    | 42,478,458.50    |                  |                 |               |

The aggregates on all accounts were therefore as follows:

|                                  | 1893.            | 1894.            | Increase.       | Decrease.       |
|----------------------------------|------------------|------------------|-----------------|-----------------|
| <b>REVENUES.</b>                 |                  |                  |                 |                 |
| Ordinary .....                   | \$385,819,628.78 | \$297,722,019.25 |                 | \$88,097,609.53 |
| Account of debt .....            | 347,051,586.00   | 426,284,519.21   | \$79,232,933.21 |                 |
| Total .....                      | 732,871,214.78   | 724,006,538.46   | 79,232,933.21   | 88,097,609.53   |
| Net decrease .....               |                  |                  |                 | 8,864,676.32    |
| <b>EXPENDITURES.</b>             |                  |                  |                 |                 |
| Ordinary .....                   | 383,477,954.49   | 367,525,279.83   |                 | 15,952,674.66   |
| Account of debt .....            | 389,530,044.50   | 331,383,272.95   |                 | 58,146,771.55   |
| Total .....                      | 773,007,998.99   | 698,908,552.78   |                 | 74,099,446.21   |
| Revenues over expenditures ..... |                  | 25,097,985.68    | 65,234,769.89   |                 |
| Expenditures over revenues ..... | 40,136,784.21    |                  |                 |                 |

As between the net ordinary receipts and disbursements and those on account of loans on the one hand and those on account of deposits for certificates and Treasury notes on the other, the aggregates are divided thus:

|                                  | 1893.            | 1894.            | Increase.      | Decrease.       |
|----------------------------------|------------------|------------------|----------------|-----------------|
| <b>ORDINARY AND LOANS.</b>       |                  |                  |                |                 |
| Revenues .....                   | \$479,896,108.78 | \$463,967,348.46 |                | \$15,928,760.32 |
| Expenditures .....               | 484,341,508.99   | 409,671,262.78   |                | 14,670,246.21   |
| Expenditures over revenues ..... | 4,445,400.21     | 5,703,914.32     | \$1,258,514.11 |                 |
| <b>DEPOSITS.</b>                 |                  |                  |                |                 |
| Revenues .....                   | 252,975,106.00   | 260,039,190.00   | 7,064,084.00   |                 |
| Expenditures .....               | 288,666,490.00   | 229,237,290.00   |                | 59,429,200.00   |
| Revenues over expenditures ..... |                  | 30,801,900.00    | 66,493,284.00  |                 |
| Expenditures over revenues ..... | 35,691,384.00    |                  |                |                 |

## STATE OF THE TREASURY.

The balance standing charged to the Treasurer on the books of the Department at the close of business on June 30, 1893, was \$738,467,555.07. Adding thereto the receipts for the year from all sources, which amounted to \$724,006,538.46, as above stated, gives \$1,462,474,093.53 as the total to be accounted for, and deducting from this \$698,908,552.78, the aggregate expenditures for the year, leaves \$763,565,540.75, the balance on June 30, 1894.

In addition to this accountability to the Department, the Treasurer had liabilities on his agency account, arising from the postal revenues, disbursing officers' balances, the 5 per cent fund for the redemption of national bank notes, and from other sources. These amounted to \$37,119,930.64 at the former date and to \$40,268,751.34 at the latter. The sums of \$454,322.29 and \$1,020,461.22 had also been received at the two dates, respectively, which had not yet been covered by warrant or charged to the Treasurer by the Department. The total liabilities of the Treasury were therefore as follows:

| Account.              | June 30, 1893.   | June 30, 1894.   |
|-----------------------|------------------|------------------|
| General.....          | \$738,467,555.07 | \$763,565,540.75 |
| Agency.....           | 37,119,930.64    | 40,268,751.34    |
| Uncovered moneys..... | 454,322.29       | 1,020,461.22     |
| Total.....            | 776,041,808.00   | 804,854,753.31   |

Against these liabilities there were held in the several offices of the Treasury and Mint the sums of money and securities exhibited in the usual tables in the appendix, which, together with the other authorized items of credit, may be summarized thus:

| Description.                            | June 30, 1893.   | June 30, 1894.   |
|-----------------------------------------|------------------|------------------|
| Gold coin and bullion.....              | \$189,075,634.59 | \$131,316,470.70 |
| Silver coin and bullion.....            | 492,696,226.82   | 513,174,338.37   |
| Notes and certificates.....             | 44,222,765.28    | 115,135,264.24   |
| Minor coin and fractional currency..... | 607,882.83       | 1,356,950.93     |
| Deposits in national banks.....         | 14,387,107.32    | 14,314,529.53    |
| Bonds and interest paid.....            | 5,549,038.74     | 13,005.73        |
| Deposits with States.....               | 28,101,644.91    | 28,101,644.91    |
| Unavailable funds.....                  | 1,393,822.88     | 1,393,822.88     |
| Unpaid loss on recoinage.....           | 7,684.63         | 48,726.02        |
| Total.....                              | 776,041,808.00   | 804,854,753.31   |

By the foregoing the condition of the Treasury is reconciled at once with the accounts of the Department and with the results of the operations of the fiscal year.

The amount on deposit with the States is not carried on the Treasurer's books, and in the statements of assets contained in this report the unavailable funds and the loss on recoinage of uncurrent coins are also omitted, the liabilities on general account being correspondingly diminished. In summary form the true assets and liabilities are therefore given as follows:

|                      | June 30, 1893.   | June 30, 1894.   |
|----------------------|------------------|------------------|
| Assets.....          | \$746,538,555.58 | \$775,310,559.50 |
| Liabilities:         |                  |                  |
| General account..... | 709,418,724.94   | 735,041,808.16   |
| Agency account.....  | 37,119,930.64    | 40,268,751.34    |
| Total.....           | 746,538,655.58   | 775,310,559.50   |

While the proceeds of the revenues from all sources are massed together in the vaults and the accounts, it is convenient, in arriving at the condition of the general fund, to set aside the gold, silver, and United States notes which are on deposit against outstanding certificates and Treasury notes from the other assets, which are available for ordinary expenditures. If the deposit business of the Treasury were considered a separate one, the assets and liabilities arising from it would be stated as follows:

|                                  | June 30, 1893.        | June 30, 1894.        |
|----------------------------------|-----------------------|-----------------------|
| <b>Assets:</b>                   |                       |                       |
| Gold coin and bullion .....      | \$94,041,189.00       | \$66,387,899.00       |
| Silver dollars and bullion ..... | 478,147,731.00        | 489,732,921.00        |
| United States notes .....        | 12,405,000.00         | 60,035,000.00         |
| <b>Total</b> .....               | <b>584,593,920.00</b> | <b>616,155,820.00</b> |
| <b>Liabilities:</b>              |                       |                       |
| Gold certificates .....          | 94,041,189.00         | 66,387,899.00         |
| Silver certificates .....        | 330,957,504.00        | 337,148,504.00        |
| Currency certificates .....      | 12,405,000.00         | 60,035,000.00         |
| Treasury notes of 1890 .....     | 147,190,227.00        | 152,584,417.00        |
| <b>Total</b> .....               | <b>584,593,920.00</b> | <b>616,155,820.00</b> |

The assets and liabilities on account of the general fund would appear thus:

|                                          | June 30, 1893.        | June 30, 1894.        |
|------------------------------------------|-----------------------|-----------------------|
| <b>Assets:</b>                           |                       |                       |
| Gold coin and bullion .....              | \$95,034,445.59       | \$64,928,571.70       |
| Silver coin and bullion .....            | 14,548,495.82         | 23,441,417.37         |
| Notes and certificates .....             | 31,817,765.28         | 55,100,264.24         |
| Minor coin and fractional currency ..... | 607,882.83            | 1,356,950.93          |
| Deposits in national banks .....         | 14,387,107.32         | 14,314,529.53         |
| Bonds and interest paid .....            | 5,549,038.74          | 13,005.73             |
| <b>Total</b> .....                       | <b>161,944,735.58</b> | <b>159,154,739.50</b> |
| <b>Liabilities:</b>                      |                       |                       |
| Agency account .....                     | 37,119,930.64         | 40,268,751.34         |
| Balance general account .....            | 124,824,804.94        | 118,885,988.16        |
| <b>Total</b> .....                       | <b>161,944,735.58</b> | <b>159,154,739.50</b> |

In former reports there have appeared tables showing the amounts of the different kinds of money in the Treasury, but not of the other assets, at the end of each month for a series of years. These tables have now been extended to include all the assets, as well as the liabilities, so that in their present shape, as they will be found in the appendix, they afford a complete view of the condition of the Treasury at intervals of a month since June, 1878. Several forms of statement having been currently in use during the period, differing chiefly in details of arrangement and in the scope of the obligations admitted as liabilities, it has been deemed proper, with a view to convenience of reference and comparison, to follow a uniform method of treatment. In the present tabulation, therefore, the form which has for some time been employed in the monthly debt statement has been adhered to throughout.

In consequence of the insufficiency of the revenues to meet the expenditures the Treasury has been drained of its available resources, and the

difficulties produced by this condition have been increased by the unavoidable impairment of the gold reserve. In proportion, however, to the total net cash balance the reserve was well kept up so long as it was exempt from any direct inroads upon itself. To the end of 1893 it maintained, in fact, an increasing ratio to the general balance in the Treasury, being materially aided by the voluntary contributions of gold from the banks in exchange for paper currency. Even when the supply of paper had become so reduced that the Treasury was obliged to pay out large sums of gold in the ordinary disbursements, there was no consequent diminution of the reserve, the coin being freely returned in the revenues. A good part of the gold imported during the months of August and September, 1893, also found its way into the Treasury.

Early in January, however, it became apparent that extraordinary measures must be resorted to for the rehabilitation of the reserve. When this necessity came to be fully recognized, although there were no considerable withdrawals of gold in redemption of notes, a less proportion of the coin paid out in the disbursements was returned, and the decrease of the reserve became more rapid. The proceeds of the loan of \$50,000,000 in 5 per cent ten-year bonds, which was then offered, were as follows:

|                           |                 |
|---------------------------|-----------------|
| Gold coin.....            | \$52,850,264.24 |
| Gold certificates.....    | 5,810,420.00    |
| Other kinds of money..... | 233.39          |
| Total.....                | 58,660,917.63   |

The amount realized was divided on account of principal, premium, and accrued interest in the following proportions:

|                       |                 |
|-----------------------|-----------------|
| Principal.....        | \$50,000,000.00 |
| Premium.....          | 8,633,295.71    |
| Accrued interest..... | 27,621.92       |
| Total.....            | 58,660,917.63   |

From the varied character of the operations going on concurrently, it is impossible to state exactly the net result of the sale of bonds. During the month of February, however, while the proceeds of the sale were coming in, there being within the same period an excess of \$7,000,000 of payments over ordinary receipts, the net assets of the Treasury increased from \$125,060,971 to \$177,165,927. So far as the gold reserve was concerned, the gross receipts of nearly \$58,700,000 in gold and gold certificates from the loan were offset, in part, by the redemption, within the month, of \$19,200,000 of United States notes and Treasury notes in gold, leaving a net gain of \$39,500,000. A further gain of about \$1,500,000 from ordinary sources brought the reserve up from \$65,650,175 to \$106,527,068.

During the succeeding months, till the end of the first week in August, the gold reserve was adversely affected by the combined influences of deficient revenues and withdrawals for export. The movement abroad was stimulated, too, by the necessity which the Treasury was under of furnishing exporters new full-weight coin, the supply of pieces that had been in circulation and become somewhat abraded having been exhausted in the earlier part of the season. With the cessation of exports the reserve began once more to increase, notwithstanding the gradual diminution of the available balance.

The following table shows the total amount of gold in the Treasury, the amount of gold certificates in circulation, the net gold in the Treasury, the net balance or excess of assets over demand liabilities, and the net assets or assets in excess of outstanding certificates and Treasury notes, at intervals of three times a month from January, 1893, to October, 1894:

| Date.        | Total gold in Treasury. | Gold certificates in circulation. | Net gold in Treasury. | Net balance.  | Net assets.   |
|--------------|-------------------------|-----------------------------------|-----------------------|---------------|---------------|
| 1893.        |                         |                                   |                       |               |               |
| January 10   | \$237,448,372           | \$117,750,679                     | \$119,697,693         | \$131,301,178 | \$174,071,246 |
| January 19   | 237,891,569             | 121,702,969                       | 116,188,600           | 130,694,989   | 172,893,231   |
| January 31   | 228,827,532             | 120,645,819                       | 108,181,713           | 125,265,067   | 165,382,647   |
| February 10  | 226,356,869             | 114,429,189                       | 111,927,680           | 124,628,970   | 160,614,242   |
| February 20  | 220,893,047             | 113,664,579                       | 107,228,468           | 123,080,302   | 165,346,029   |
| February 28  | 217,672,948             | 114,388,729                       | 103,284,219           | 124,128,089   | 162,493,922   |
| March 10     | 216,875,237             | 114,572,419                       | 102,302,818           | 125,655,368   | 160,040,452   |
| March 20     | 219,808,303             | 113,232,719                       | 106,575,584           | 123,501,305   | 165,261,913   |
| March 31     | 218,378,233             | 111,486,000                       | 106,892,224           | 125,630,728   | 165,340,336   |
| April 10     | 216,433,583             | 110,243,929                       | 106,189,654           | 125,332,919   | 168,006,822   |
| April 20     | 210,874,230             | 109,870,929                       | 101,003,301           | 125,060,015   | 166,533,241   |
| April 29     | 202,283,359             | 105,272,029                       | 97,011,330            | 121,482,903   | 160,527,495   |
| May 10       | 203,022,685             | 103,797,019                       | 99,225,666            | 121,552,957   | 162,038,688   |

The lowest point touched by the gold reserve was \$52,189,500, on August 7, 1894.

In the absence of a complete record of the receipts of the different kinds of money, the following statement showing the totals and the percentages of the several classes paid into the subtreasury in New York for customs, during the same period as that covered by the last table, is presented:

| Month.            | Receipts.   | Gold coin.       | Silver coin.     | Gold certificates. | Silver certificates. | United States notes. | Treasury notes of 1890. |
|-------------------|-------------|------------------|------------------|--------------------|----------------------|----------------------|-------------------------|
| 1893.             |             | <i>Per cent.</i> | <i>Per cent.</i> | <i>Per cent.</i>   | <i>Per cent.</i>     | <i>Per cent.</i>     | <i>Per cent.</i>        |

Prior to July, 1892, the gold reserve was but little affected by withdrawals of coin. There had never been any considerable demand for the redemption of notes. Even in seasons when exports of gold were heavy the metal was furnished by bankers directly from their vaults or was obtained from the Treasury for gold certificates, of course without impairment to the reserve. Such insignificant losses as were sustained by the Treasury came generally toward the last of the exporting movement, when bankers' supplies of coin and certificates had become reduced. During the last two years, however, the Treasury has been called upon to furnish nearly the whole of the requirements for exportation. Besides, there have recently been considerable withdrawals on United States notes and Treasury notes for other uses. Upwards of nineteen millions was taken in February last, as already stated, presumably for application in payment of subscriptions to the loan issued during that month.

The following table shows the amounts of United States notes and Treasury notes redeemed in gold during each month, from October, 1891, when the first redemption of Treasury notes occurred, to September, 1894, and also the exports of gold:

| Month.            | United States notes. | Treasury notes of 1890. | Total.             | Exports of gold.   |
|-------------------|----------------------|-------------------------|--------------------|--------------------|

## THE PUBLIC DEBT.

Two important events affecting the condition of the public debt occurred during the year—the issue of \$50,000,000 of 5 per cent bonds to replenish the gold reserve, and the stoppage of the purchase of silver bullion with Treasury notes. A further increase of \$4,790 in the principal of the interest-bearing debt was produced by the conversion of interest on refunding certificates into 4 per cent bonds.

As given in the statement published monthly, the condition of the debt on June 30, 1893 and 1894, was as follows:

| Class.                                       | June 30, 1893.   | June 30, 1894.   |
|----------------------------------------------|------------------|------------------|
| Interest-bearing loans.....                  | \$585,037,100.00 | \$635,041,890.00 |
| Matured loans.....                           | 2,094,060.26     | 1,851,240.26     |
| Old demand notes.....                        | 55,647.50        | 54,847.50        |
| United States notes.....                     | 346,681,016.00   | 346,681,016.00   |
| Fractional currency, estimated.....          | 6,900,504.62     | 6,897,137.42     |
| National bank notes, redemption account..... | 20,663,437.75    | 26,371,685.50    |
| Treasury notes of 1890.....                  | 147,190,227.00   | 152,584,417.00   |
| Certificates of deposit.....                 | 437,363,693.00   | 462,771,403.00   |
| Total.....                                   | 1,545,985,686.13 | 1,632,253,636.68 |

With respect to conditions of payment the debt may be classified under five general heads, as shown below:

| Condition of payment.               | June 30, 1893.   | June 30, 1894.   |
|-------------------------------------|------------------|------------------|
| At maturity, future dates.....      | \$559,672,600.00 | \$609,677,390.00 |
| At option of the United States..... | 25,364,500.00    | 25,364,500.00    |
| On demand, without reissue.....     | 29,713,650.13    | 35,174,910.68    |
| On demand, for reissue.....         | 493,871,243.00   | 499,265,433.00   |
| On demand, out of deposits.....     | 437,363,693.00   | 462,771,403.00   |
| Total.....                          | 1,545,985,686.13 | 1,632,253,636.68 |

The Treasury notes, which in this list are classed with the United States notes as reissuable, are, however, subject to cancellation and retirement when redeemed in silver dollars coined under the act of July 14, 1890. In some respects, therefore, they have more resemblance to silver certificates, but they can not be issued upon deposits of silver dollars, although the dollars paid out in their redemption may afterwards be deposited for silver certificates.

Prior to August, 1893, the Treasury had been able to provide for the redemption of Treasury notes in silver dollars out of the holdings of free silver, so that there had not been, up to that time, any impairment of the total amount of the silver fund accumulated under the act. On the 3d of that month, however, the silver dollars and bullion in the Treasury had become reduced to the amount required by law to be retained for the payment of outstanding Treasury notes and certificates, and the demand for the redemption of notes continuing in consequence of the scarcity of small denominations of currency, it became necessary to draw upon the dollars coined especially for that purpose. The silver fund being thus impaired, the notes so redeemed were canceled, in order to preserve the required equality between the silver in the Treasury and the notes outstanding. The total amount of the notes retired in this way, up to October 31, was \$4,790,434.

#### THE CURRENCY.

According to the revised estimates the stock of gold, silver, and paper money in the United States on June 30, 1893 and 1894, was composed as follows:

| Kind.                       | June 30, 1893. | June 30, 1894. |
|-----------------------------|----------------|----------------|
| Gold coin.....              | \$519,156,102  | \$582,512,083  |
| Gold bullion.....           | 78,54,583      | 44,781,118     |
| Silver dollars.....         | 419,332,450    | 419,333,208    |
| Fractional silver coin..... | 77,415,123     | 76,249,925     |
| Silver bullion.....         | 119,113,911    | 128,764,624    |
| Total coin and bullion..... | 1,213,559,169  | 1,251,640,958  |
| United States notes.....    | 346,681,016    | 346,681,016    |
| Treasury notes of 1890..... | 147,190,227    | 152,584,417    |
| National bank notes.....    | 178,713,872    | 207,353,244    |
| Gold certificates.....      | 94,041,189     | 66,387,899     |
| Silver certificates.....    | 330,957,504    | 337,148,504    |
| Currency certificates.....  | 12,405,000     | 60,035,000     |
| Total paper currency.....   | 1,109,988,808  | 1,170,190,080  |
| Aggregate.....              | 2,323,547,977  | 2,421,831,038  |

The estimated effective stock of money, which is arrived at by eliminating from the list of paper issues the certificates of deposit and Treasury notes, as merely representative, on June 30 in each of the last five years, was as follows:

| Kind.       | 1890.         | 1891.         | 1892.         | 1893.         | 1894.         |
|-------------|---------------|---------------|---------------|---------------|---------------|
| Gold.....   | \$695,563,029 | \$646,582,852 | \$664,275,335 | \$597,697,685 | \$627,293,201 |
| Silver..... | 463,211,919   | 522,277,740   | 570,313,544   | 615,861,484   | 624,347,757   |
| Notes.....  | 532,651,791   | 514,608,990   | 519,364,866   | 525,394,888   | 554,034,260   |
| Total.....  | 1,691,426,739 | 1,683,469,582 | 1,753,953,745 | 1,738,954,057 | 1,805,675,218 |

The following table, compiled from the official records of imports and exports and the monthly estimates of the total stock of gold, exhibits the gains and losses of that metal during the fifteen months ending with September:

| Month.          | Net imports. | Net exports. | Net production. | Net consumption. | Increase.    | Decrease.   |
|-----------------|--------------|--------------|-----------------|------------------|--------------|-------------|
| 1893.           |              |              |                 |                  |              |             |

Since the repeal of the clauses in the act of July 14, 1890, requiring the purchase of silver bullion by the issue of Treasury notes, the monetary stock of silver has been affected mainly by the operations of the mint upon the subsidiary coinage. Consequently, since November 1, 1893, the date of the repeal, the stock of this metal has practically remained stationary. The volume of United States notes being fixed by law, and the Treasury notes issued under the act of 1890 being considered merely representative of silver, the variations in the supply of notes are confined to the national-bank circulation. After a rapid expansion of \$30,000,000, during July, August, and September, 1893, the changes in this medium, too, became unimportant.

In the following table are given the net exports, the estimated net production, and the consequent increase and decrease in the monetary stock of silver, together with the increase and decrease of national-bank notes, during the fifteen months ending with September:

| Month.          | Silver.      |                 |            |           | Notes.      |           |
|-----------------|--------------|-----------------|------------|-----------|-------------|-----------|
|                 | Net exports. | Net production. | Increase.  | Decrease. | Increase.   | Decrease. |
| 1893.           |              |                 |            |           |             |           |
| July .....      | \$4,007,976  | \$4,419,557     | \$411,581  | .....     | \$5,041,275 | .....     |

#### ISSUE AND REDEMPTION OF CURRENCY.

Since the Government began the issue of paper money, the amount of new pieces put in circulation during the last fiscal year has been exceeded in any like period but once, in 1892, and the amount redeemed, but once, in 1893. Including national-bank notes, the issues of the year, however, exceeded the redemptions by upwards of \$60,000,000. In consequence, the total paper circulation of the country reached at the end of May last the highest point ever attained, the amount of all issues then outstanding—exclusive of fractional currency, of which a considerable remnant is still in existence—being \$1,175,054,480. Since then there has been a slight contraction, caused chiefly by the gradual redemption and retirement of gold certificates, the issue of which was suspended, as required by law, when the gold reserve of the Treasury fell below \$100,000,000.

The following table shows the amounts of each denomination of all kinds of paper money, inclusive of national-bank notes, issued and redeemed during the year, the total issued and redeemed, and the amount outstanding on June 30:

| Denomination.              | Issued during year. | Total issued. | Redeemed during year. | Total redeemed.  | Outstanding.     |
|----------------------------|---------------------|---------------|-----------------------|------------------|------------------|
| One dollar.....            | \$19,912,190        | \$332,241,974 | \$21,302,589          | \$293,721,793.70 | \$33,520,180.90  |
| Two dollars.....           | 12,496,000          | 283,418,086   | 15,549,516            | 265,060,702.80   | 28,357,383.20    |
| Five dollars.....          | 84,318,760          | 1,371,678,220 | 93,046,905            | 1,135,911,881.50 | 235,766,338.50   |
| Ten dollars.....           | 90,160,460          | 1,357,523,310 | 93,440,930            | 1,061,569,624.00 | 295,953,686.00   |
| Twenty dollars.....        | 71,262,160          | 1,000,294,780 | 60,992,840            | 760,058,880.00   | 240,235,900.00   |
| Fifty dollars.....         | 9,087,550           | 293,408,850   | 10,223,250            | 250,737,485.00   | 42,731,365.00    |
| One hundred dollars.....   | 27,264,900          | 443,348,300   | 16,730,200            | 358,151,030.00   | 85,197,270.00    |
| One hundred dollars.....   | .....               | 289,209,500   | 5,830,500             | 272,007,500.00   | 17,202,000.00    |
| One thousand dollars.....  | 48,920,000          | 621,253,000   | 15,520,000            | 530,310,500.00   | 90,942,500.00    |
| Five thousand dollars..... | 290,000             | 694,685,000   | 5,925,000             | 682,090,000.00   | 12,595,000.00    |
| Ten thousand dollars.....  | 77,600,000          | 1,660,280,000 | 42,290,000            | 1,577,890,000.00 | 82,390,000.00    |
| Total.....                 | 441,313,020         | 8,347,401,020 | 380,851,730           | 7,177,509,397.00 | 1,169,891,623.00 |
| Unknown, destroyed.....    | .....               | .....         | .....                 | .....            | 1,000,009.00     |
| Net.....                   | .....               | .....         | .....                 | .....            | 1,168,891,623.00 |

Recent operations of the Treasury in preparing and distributing the supplies of currency demanded by the public have been conducted with much less difficulty than had formerly been encountered. Increased facilities for the manufacture of the notes have enabled the Department easily to keep pace in the work of issuing with the demands for redemption. Such embarrassments as have been felt were occasioned chiefly by the narrow margin of the available resources of the Treasury, which has made it necessary for the greater part of the time to destroy old material before new could be delivered. The greater ease of the currency situation, growing out of the unusually large supply and a more general distribution throughout the country, has also lessened the strain upon the Treasury. A considerable share of the autumn demand for small notes has been supplied this season by local bankers, without assistance either from their city correspondents or the Treasury, and to that extent the Treasury has been relieved, while the metropolitan financial institutions have found the opportunity to convert a part of their paper holdings into large denominations. As a result of this change in conditions, the proportion of small notes, which for some time had been steadily increasing, fell off during the past year both relatively to the whole circulation and in the aggregate.

The amounts of the denominations of twenty dollars and under and of fifty dollars and over, of all kinds of paper money outstanding at the close of the last four fiscal years, were as follows:

| Denomination.                  | 1891.            | 1892.            | 1893.            | 1894.            |
|--------------------------------|------------------|------------------|------------------|------------------|
| Twenty dollars and under ..... | \$765, 475, 318  | \$814, 171, 490  | \$845, 015, 698  | \$838, 833, 488  |
| Fifty dollars and over.....    | 290, 941, 635    | 326, 254, 685    | 264, 414, 635    | 331, 058, 135    |
| Total .....                    | 1, 056, 416, 953 | 1, 140, 426, 175 | 1, 109, 430, 333 | 1, 169, 891, 623 |

#### THE COINAGE.

The following table shows the amounts of uncurrent gold and silver coins transferred during the fiscal year from the Treasury to the mint to be recoined, together with the loss arising from their conversion into bullion:

| Denomination.            | Amount.         | Loss.        |
|--------------------------|-----------------|--------------|
| Double eagles.....       | \$546, 020. 00  | .....        |
| Eagles.....              | 318, 180. 00    | .....        |
| Half eagles.....         | 346, 225. 00    | .....        |
| Quarter eagles.....      | 139, 957. 50    | .....        |
| Three-dollar pieces..... | 149, 547. 00    | .....        |
| One-dollar pieces.....   | 141. 00         | .....        |
| Total gold.....          | 1, 500, 070. 50 | \$6, 333. 02 |
| Standard dollars.....    | 14, 350. 00     | .....        |
| 50-cent pieces.....      | 4, 284, 426. 50 | .....        |
| 25-cent pieces.....      | 2, 257, 913. 00 | .....        |
| 20-cent pieces.....      | 951. 80         | .....        |
| 10-cent pieces.....      | 621, 012. 00    | .....        |
| 5-cent pieces.....       | 5, 483. 80      | .....        |
| 3-cent pieces.....       | 335. 07         | .....        |
| Total silver.....        | 7, 184, 472. 17 | 259, 719. 12 |
| Aggregate.....           | 8, 684, 542. 67 | 266, 052. 14 |

There was also transferred to the mint at Philadelphia \$118,605 in minor coin to be cleaned and reissued.

During the past three fiscal years worn and abraded silver coins, mostly 25 and 50 cent pieces, amounting to upward of \$22,000,000, were withdrawn from circulation and melted. The fresh coinage for which the product furnished material has brought about a marked improvement in this part of the currency.

The management of the Columbian Exposition having finally declined to defray the expense of recoinng the Columbian half dollars which had found their way into the Treasury, they have been offered to the public at par in exchange for gold or gold certificates, and a considerable sum of them has been distributed in that manner. The Isabella quarters in the Treasury are retained for the requisitions of the board of lady managers of the exposition.

#### SPURIOUS AND FRAUDULENT ISSUES.

Counterfeit silver coins and paper currency of the following denominations and amounts were detected during the year at the offices of the Treasury:

| Denomination.             | Silver coins. | United States notes. | Treasury notes of 1890. | National bank notes. | Silver certificates. | Fractional currency. | Total.    |
|---------------------------|---------------|----------------------|-------------------------|----------------------|----------------------|----------------------|-----------|
| Ten cents .....           |               |                      |                         |                      |                      | \$0.50               | \$0.50    |
| Twenty-five cents .....   | \$654.50      |                      |                         |                      |                      | 24.50                | 679.00    |
| Fifty cents .....         | 504.50        |                      |                         |                      |                      | 204.00               | 708.50    |
| One dollar .....          | 1,731.00      | \$9.00               |                         |                      | \$33.00              |                      | 1,773.00  |
| Two dollars .....         |               | 14.00                | \$2.00                  | \$34.00              | 522.00               |                      | 572.00    |
| Five dollars .....        |               | 100.00               |                         | 405.00               | 335.00               |                      | 840.00    |
| Ten dollars .....         |               | 670.00               |                         | 570.00               |                      |                      | 1,240.00  |
| Twenty dollars .....      |               | 1,040.00             |                         | 560.00               |                      |                      | 1,600.00  |
| Fifty dollars .....       |               | 1,550.00             |                         | 200.00               |                      |                      | 1,750.00  |
| One hundred dollars ..... |               | 600.00               |                         | 800.00               |                      |                      | 1,400.00  |
| Total .....               | 2,890.00      | 3,983.00             | 2.00                    | 2,569.00             | 890.00               | 229.00               | 10,563.00 |

In comparison with the preceding year the total is \$905 greater, the increase being in silver coins, United States notes, and silver certificates.

#### TRUST FUNDS.

United States bonds of the descriptions and amounts exhibited in the following table were held on June 30 in trust for national banks to secure circulating notes and public deposits:

| Kind of bonds.                          | Rate of interest. | To secure circulation. | To secure public deposits. | Total.       |
|-----------------------------------------|-------------------|------------------------|----------------------------|--------------|
|                                         | <i>Per cent.</i>  |                        |                            |              |
| Bonds issued to Pacific railroads ..... | 6                 | \$15,292,000           | \$1,195,000                | \$16,487,000 |
| Funded loan of 1891, continued .....    | 2                 | 22,711,850             | 1,013,000                  | 23,724,850   |
| Funded loan of 1907 .....               | 4                 | 158,837,950            | 12,072,000                 | 170,915,950  |
| Loan of 1904 .....                      | 5                 | 4,849,950              | 450,000                    | 5,299,950    |
| Total .....                             |                   | 201,691,750            | 14,736,000                 | 216,427,750  |

There were \$45,377,650 of bonds deposited and \$20,274,150 with drawn as security for circulating notes; and \$1,882,000 deposited and \$2,393,000 withdrawn as security for public deposits.

The following-described bonds were held on June 30 for the sinking funds of the Pacific railroads.

| Kind of bonds.                                       | Rate of interest. | Union Pacific sinking fund. | Central Pacific sinking fund. | Total.      |

| Total.....                                           | 962,666.66 $\frac{2}{3}$   | 516,000   | 1,478,666.66 $\frac{2}{3}$ |

Under the provisions of the second section of the act approved August 15, 1894, making appropriations for the Indian service, the face value of the State bonds and stocks included in the above list has been placed upon the books of the Treasury to the credit of the several tribes, to draw interest at the rate of 5 per cent per annum, and the bonds and stocks have become the property of the United States. The Pacific Railroad bonds in the list remain on deposit on account of the fund. Besides the obligations so transferred, the following-described bonds and stocks, also belonging to the United States, are held, as formerly, for the Secretary of the Treasury:

| Kind.                                                        | Amount.   |
|--------------------------------------------------------------|-----------|
| Arkansas State bonds.....                                    | \$625,000 |
| Louisiana State bonds.....                                   | 15,000    |
| North Carolina State bonds.....                              | 20,000    |
| Tennessee State bonds.....                                   | 21,000    |
| Virginia State bonds.....                                    | 41,800    |
| Chesapeake and Ohio Canal bonds, guaranteed by Virginia..... | 12,000    |
| South Carolina State stocks.....                             | 3,000     |
| Florida State stocks.....                                    | 90,000    |
| Total.....                                                   | 827,800   |

United States bonds are held, under various provisions of law, for private institutions as follows:

| Institution.                                | Rate of interest. | Amount.   |
|---------------------------------------------|-------------------|-----------|
|                                             | <i>Per cent.</i>  |           |
| American Printing House for the Blind ..... | 4                 | \$250,000 |
| Manhattan Savings Institution .....         | 4                 | 75,000    |
| North American Commercial Company .....     | 2                 | 50,000    |
| Total .....                                 |                   | 375,000   |

A special deposit of \$70,000 of United States 4 per cent bonds is held in the name of the Comptroller of the Currency for the benefit of the Fidelity National Bank, of Cincinnati.

Captured bonds of the State of Louisiana, of the face value of \$545,000; are held for the Secretary of War.

#### REDEMPTION OF NATIONAL-BANK NOTES.

After unimportant variations from month to month for a period of years the receipts of national-bank notes for redemption were suddenly reduced by the monetary stringency of last year to the lowest point they had ever reached since the establishment of the redemption agency at Washington. Upon the subsidence of the panic and the return of the currency to the banks the demands for redemption increased as suddenly as they had fallen off, assuming at once proportions that had not before been equaled in fifteen years, and that consequently exceeded the immediate capacities of the agency. As a large part of the notes presented were fit for further use, and as these, together with the new notes sent to the banks in place of those canceled and destroyed, were returned into circulation, there was no diminution of the amount outstanding. A change of regulation, whereby the senders were required to bear the charges of transportation, had the effect of cutting down the receipts somewhat. Nevertheless the total for the year, reaching \$105,000,000, or more than half of the average circulation, was the heaviest since 1886, and, in proportion to the outstanding volume, the heaviest since the early years of redemptions in Washington.

In concluding this report, I take pleasure in renewing my acknowledgment of the faithfulness and ability which, during a period of unusual difficulty, the officers and employés associated with me have displayed in the performance of their responsible duties.

I have the honor to be, very respectfully, your obedient servant,

DANIEL N. MORGAN,

*Treasurer of the United States.*

Hon. JOHN G. CARLISLE,

*Secretary of the Treasury.*

## REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,  
BUREAU OF THE MINT,  
*Washington, D. C., November 24, 1894.*

SIR: The following report, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1894, being the twenty-second annual report of the Director of the Mint, is respectfully submitted.

### DEPOSITS OF GOLD.

During the year the amount of original deposits of gold at the mints and assay offices of the United States, including gold contained in silver deposits and purchases, was 3,865,136.342 standard ounces, of the value of \$71,909,513.31, showing an increase as compared with the previous fiscal year of 1,368,457.359 standard ounces, of the value of \$25,459,671.81.

The value of the redeposits of gold during the year was \$69,033,032.17, an increase over 1893 of \$64,642,968.14, making an aggregate increase in the total amount deposited during the year of \$90,102,639.95.

The following table exhibits the classification and weight in standard ounces of the deposits and redeposits of gold bullion at the mints and assay offices of the United States for the fiscal years 1893 and 1894, and the increase or decrease of each class during the latter year:

WEIGHT OF THE DEPOSITS AND REDEPOSITS OF GOLD BULLION AT THE MINTS AND ASSAY OFFICES OF THE UNITED STATES DURING THE FISCAL YEARS 1893 AND 1894, AND THE INCREASE OR DECREASE OF THE SAME DURING THE LATTER YEAR.

| Classification of deposits of gold. | Fiscal year.       |                    | Increase, 1894.    | Decrease, 1894.    |

#### DEPOSITS AND PURCHASES OF SILVER.

The original deposits and purchases of silver, including silver contained in gold deposits, aggregated during the fiscal year ended June 30, 1894, 24,661,510.89 standard ounces, of the coining value of \$28,697,030.81 in standard silver dollars, as compared with 72,388,449.92 standard ounces, of the value of \$84,233,832.61, during the prior fiscal year, a decrease of 47,726,939.03 standard ounces, of the value of \$55,536,801.80.

The redeposits of silver at the mints and assay offices during the fiscal year 1894 were 612,557.24 standard ounces, of the coinage value in silver dollars of \$712,793.87, as compared with 747,255.84 standard ounces, of the value of \$869,534.06, during the fiscal year 1893, showing a decrease in the value of \$156,740.19.

The classification and value of the deposits, including redeposits, of silver bullion at the mints and assay offices of the United States during the fiscal years 1893 and 1894, and the increase or decrease in the latter year are shown in the following table:

WEIGHT OF THE DEPOSITS AND REDEPOSITS OF SILVER BULLION AT THE MINTS AND ASSAY OFFICES OF THE UNITED STATES DURING THE FISCAL YEARS 1893 AND 1894, AND THE INCREASE OR DECREASE OF THE SAME DURING THE LATTER YEAR.

| Classification of deposits of silver. | Fiscal year.      |                   | Increase, 1894. | Decrease, 1894.   |
|---------------------------------------|-------------------|-------------------|-----------------|-------------------|

The following table exhibits the classification and weight of the deposits and redeposits of silver bullion at the mints and assay offices of the United States during the fiscal years 1893 and 1894, and the increase or decrease of the same during 1894:

VALUE OF THE DEPOSITS AND REDEPOSITS OF SILVER BULLION AT THE MINTS AND ASSAY OFFICES OF THE UNITED STATES DURING THE FISCAL YEARS 1893 AND 1894, AND THE INCREASE OR DECREASE OF THE SAME DURING THE LATTER YEAR.

| Classification of deposits of silver. | Fiscal year.   |                | Increase, 1894. | Decrease, 1894. |
|---------------------------------------|----------------|----------------|-----------------|-----------------|
|                                       | 1893.          | 1894.          |                 |                 |
| Domestic production:                  |                |                |                 |                 |
| Crude bullion.....                    | \$4,131,602.23 | \$2,607,492.12 |                 | \$1,524,110.11  |
| Refined bullion.....                  | 69,534,443.00  | 17,170,208.26  |                 | 52,364,234.74   |
| Domestic coin.....                    | 6,912,634.05   | 6,481,086.00   |                 | 431,548.05      |
| Trade dollars.....                    | 545.91         | 317.93         |                 | 227.93          |
| Foreign bullion.....                  | 2,248,030.88   | 1,286,336.44   |                 | 961,694.44      |
| Foreign coin.....                     | 653,150.08     | 546,553.55     |                 | 106,596.53      |
| Jewelers' bars, old plate, etc.       | 753,426.46     | 605,036.46     |                 | 148,390.00      |
| Total original deposits...            | 84,233,832.61  | 28,697,030.81  |                 | 55,536,801.80   |
| Redeposits:                           |                |                |                 |                 |
| Fine bars.....                        | 46,286.83      | 322,736.94     | \$276,450.11    |                 |
| Unparted bars.....                    | 823,247.23     | 390,056.93     |                 | 433,190.30      |
| Total.....                            | 85,103,366.67  | 29,409,824.68  | 276,450.11      | 55,969,992.10   |

The classification of silver bullion deposited at the mints and assay offices is not exact, as fine silver bars, the product of private refineries in the United States, delivered on purchases, were without exception classified as of domestic production, although frequently composed, to a great extent, of silver obtained from ore and bullion imported from Mexico and smelted and refined in the United States.

The domestic silver coin received and melted by the mints during the year consisted of \$7,184,472.17 in worn and uncurrent coin transferred from the Treasury for recoinage, and \$5,247.95 in mutilated coin

purchased at the mints as bullion, making the total amount of domestic silver coin received and melted by the mints during the year \$7,189,720.12.

Of the fine gold bars redeposited, 3,235,212.931 standard ounces, of the value of \$60,190,008.03, were bars that had accumulated in the United States assay office at New York since 1881, and which it became necessary to transfer to the mint at Philadelphia for conversion into coin to meet the demands upon the Treasury for gold coin. There were also 46,132.601 ounces of standard gold in fine bars and 3,121.513 ounces in standard bars, of the coining value of \$916,355.61, refined at the mint at Carson, Nev., and transferred to the mint at San Francisco for coinage. The remainder, 4,580.355 ounces of standard gold of the coining value of \$85,215.90, were large bars redeposited at the assay office at New York for conversion into small bars for use in the industrial arts.

The redeposits of 3,121.513 ounces of standard metal of the value of \$58,074.66, represent the value of standard gold bullion on hand June 1, 1893, the date of the suspension of coinage operations at the mint at Carson, and which were transferred to the mint at San Francisco for conversion into coin.

The nominal or face value of uncurrent domestic gold coin received and melted by the mints and assay offices of the United States during the year was \$2,105,984; of this sum \$1,500,070.50 consisted of worn and uncurrent coin transferred by the Treasury to the mints for recoinage, and the remainder, \$605,913.50, was mutilated and uncurrent coin received from individuals. The value of the total amount in new coins of the old and uncurrent gold coin received during the year was \$2,093,615.46. The refined bullion classed as original deposits was the product of private refineries in the United States.

In the Appendix (p. 240) a table will be found showing the distribution of the amount of unrefined gold bullion deposited at the mints and assay offices of the United States during the year among the States and Territories that produced the same.

The coining value of gold and silver (exclusive of redeposits) received at the mints and assay offices of the United States each fiscal year from 1880, is shown in the following table:

VALUE OF THE GOLD AND SILVER (NOT INCLUDING REDEPOSITS) RECEIVED AT THE MINTS AND ASSAY OFFICES, 1880-1894.

| Fiscal years. | Gold.        | Silver<br>(coining value). | Total value.  |
|---------------|--------------|----------------------------|---------------|
| 1880.....     | \$98,835,096 | \$34,640,522               | \$133,475,618 |
| 1881.....     | 130,833,102  | 30,791,146                 | 161,624,248   |

| 1894.....     | 71,909,513   | 28,697,031                 | 100,606,544   |

## COINAGE.

The coinage of gold and silver executed during the year by the mints at Philadelphia, San Francisco, and New Orleans, consisted of 27,697,578 pieces of the value of \$105,499,810.80, while the minor coinage, which is by law confined to the Philadelphia Mint, consisted of 34,787,642 pieces of the value of \$716,919.26.

The denominations and value of coinage executed were as follows:

| Gold.                        | Pieces.    | Value.          |
|------------------------------|------------|-----------------|
| Double eagles.....           | 2,757,182  | \$55,143,640.00 |
| Eagles.....                  | 3,496,884  | 34,968,840.00   |
| Half eagles.....             | 1,857,436  | 9,287,180.00    |
| Quarter eagles.....          | 30,101     | 75,252.50       |
| Total gold.....              | 8,141,603  | 99,474,912.50   |
| Silver.                      | Pieces.    | Value.          |
| Standard silver dollars..... | 758        | \$758.00        |
| Half dollars.....            | 6,726,654  | 3,363,327.00    |
| Quarter dollars.....         | 9,186,380  | 2,296,595.00    |
| Dimes.....                   | 3,642,183  | 364,218.30      |
| Total silver.....            | 19,555,975 | 6,024,898.30    |
| Minor coins.                 | Pieces.    | Value.          |
| Five-cent nickels.....       | 9,226,071  | \$461,303.55    |
| One cent, bronze.....        | 25,561,571 | 255,615.71      |
| Total minor coins.....       | 34,787,642 | 716,919.26      |
| Total coinage.....           | 62,485,220 | 106,216,730.06  |

The gold coinage was the largest ever executed by the mints in any one year since the organization of the Mint.

The silver dollars coined during the fiscal year 1894 were made from bullion purchased under the act of July 14, 1890. The amount of bullion consumed in this coinage was 586.27 fine ounces, costing \$530.99, giving a profit of \$227.01, which has been paid into the Treasury.

Of the subsidiary silver coinage executed during the year, \$6,018,872.60 were from bullion resulting from the melting of worn and uncurrent silver coin transferred from the Treasury for recoinage and \$5,267.70 from silver bullion acquired under the provisions of section 3526 Revised Statutes of the United States.

During the year there were transferred from the Treasury to the mints for recoinage worn and uncurrent silver coin of the nominal value of \$7,184,472.17, containing 5,565,770.36 ounces of standard silver of the coining value in new subsidiary silver coin of \$6,924,753.05, showing a loss by wear of \$259,719.12, which sum was reimbursed the Treasury from the appropriation for loss on recoinage of worn and uncurrent silver coin.

The amount and cost of silver bullion on hand July 1, 1893, available for the subsidiary silver coinage, the amount obtained by purchase and transfer, the amount used in coinage, wasted, and sold in sweeps dur-

ing the year, and the balance on hand July 1, 1894, are shown in the following table:

## SILVER FOR SUBSIDIARY COINAGE, FISCAL YEAR 1894.

| Stock.                                           | Mint at Philadelphia. |              | Mint at San Francisco. |              |
|--------------------------------------------------|-----------------------|--------------|------------------------|--------------|
|                                                  | Fine ounces.          | Cost.        | Fine ounces.           | Cost.        |
| Silver bullion on hand July 1, 1893...           | 1,293.50              | \$1,668.87   | 353,976.57             | \$489,340.85 |

The following table shows by value the coinage executed at the mints of the United States during the fiscal years 1893 and 1894, and the increase or decrease of the same during the latter year:

| Classification of coinage.   | Fiscal years.    |                 | Increase, 1894. | Decrease, 1894. | Net increase, 1894. |
|------------------------------|------------------|-----------------|-----------------|-----------------|---------------------|
|                              | 1893.            | 1894.           |                 |                 |                     |
| Gold coin .....              | \$30,038,140.00* | \$39,474,912.50 | \$69,436,772.50 | .....           | .....               |
| Silver dollars .....         | 5,343,715.00     | 758.00          | .....           | \$5,342,957.00  | .....               |
| Subsidiary silver coin ..... | 7,217,220.90     | 6,024,140.30    | .....           | 1,193,080.60    | .....               |
| Minor coin .....             | 1,086,102.90     | 716,919.26      | .....           | 369,183.64      | .....               |
| Total .....                  | 43,685,178.80    | 106,216,730.06  | 69,436,772.50   | 6,905,221.24    | \$62,531,551.26     |

The total coinage of silver dollars under the act of July 14, 1890, up to June 30, 1894, was \$36,087,943, consuming 27,911,768.41 ounces fine, which cost \$29,110,647.24.

The seigniorage on the same was \$6,977,295.76.

From July 1 to November 1, 1894, 2,443,200 standard silver dollars containing 1,889,662.46 ounces fine, costing \$1,656,435.73, were coined from bullion purchased under the same act, giving a seigniorage of \$786,764.27, which has been covered into the Treasury.

The total number of silver dollars coined under the acts of February 28, 1878, July 14, 1890, and March 3, 1891, to November 1, 1894, is shown in the following statement:

COINAGE OF SILVER DOLLARS FROM FEBRUARY 28, 1878, TO NOVEMBER 1, 1894.

| Coinage under acts of—  | Amount.       |
|-------------------------|---------------|
| February 28, 1878 ..... | \$378,166,793 |
| July 14, 1890 .....     | 38,531,143    |
| March 3, 1891 .....     | 5,078,472     |
| Total .....             | 421,776,408   |

Tables will be found in the Appendix (p. 256) to this report, giving the denominations and values of coins manufactured by the several mints during the fiscal year 1894, and during the calendar year 1893; also showing the coinage for each calendar year since the organization of the mint of the United States in 1792 to the close of the fiscal year 1894 (p. 320).

MINOR COINAGE.

The amount of minor coinage executed by the mint at Philadelphia during the fiscal year 1894 was \$719,619.26, against \$1,086,112.90 for the fiscal year 1893, a decrease of \$369,183.64.

No minor coins were issued from the mint during the year to any of the following cities, viz: Washington, Boston, New York, Philadelphia, Baltimore, Cincinnati, Chicago, St. Louis, or New Orleans, as the amount of such coin, and especially of 5-cent nickel pieces, presented to the Treasury for redemption in lawful money showed them to be redundant. The coinage of both the 1-cent bronze pieces and the 5-cent nickel pieces was therefore suspended in April, 1894, and provisions made that when the supply of these coins then on hand at the mint at

Philadelphia had been exhausted in filling orders from cities other than those above named transfers of minor coins might be made from the surplus stock in the Treasury to the mint in such amounts as might be required to fill any orders received for the same.

The stock of 5-cent nickel pieces in the several subtreasuries would be ample to meet the requirements for some time to come but for the fact that many such pieces transferred to the mint at Philadelphia for cleaning and reissue are of old types and unfit for circulation.

These latter will be melted and recoined, as will other denominations of minor coins unfit for circulation.

It has recently been found necessary to resume the coinage of the 1-cent bronze piece for the reason that the stock on hand at the mint and in the Treasury was not sufficient to meet the demands for the same outside of the cities above mentioned.

If the mint at Philadelphia were made the sole redemption agency for minor coins, their issue could, it is believed, be confined to an amount sufficient to supply the demands, and no great redundancy of them would ever occur. Another advantage of this would be that none but coins in good condition would be paid out and complaints from this cause by the general public would not be heard.

The following table exhibits the distribution of minor coins during the fiscal year 1894:

| State or Territory.   | 5-cent nickel. | 1-cent bronze. | State or Territory.  | 5-cent nickel. | 1-cent bronze. |
|-----------------------|----------------|----------------|----------------------|----------------|----------------|
| Alabama .....         | \$718          | \$320          | Montana .....        | 1,100          |                |
| Arizona .....         | 200            |                | Nebraska .....       | 3,955          | 1,145          |
| Arkansas .....        | 755            | 245            | New Hampshire .....  | 3,775          | 3,010          |
| California .....      | 3,235          | 810            | New Jersey .....     | 21,620         | 16,608         |

| Mississippi .....     | 1,175          | 435            | Total .....          | 322,930        | 250,089        |
| Missouri .....        | 9,160          | 7,355          |                      |                |                |

The following table exhibits several types and denominations of minor coins issued by the mint at Philadelphia since its establishment, the amount remelted, and the amount apparently outstanding June 30, 1894:

| Denominations.             | Coined.        | Remelted.    | Outstanding<br>June 30, 1894. |
|----------------------------|----------------|--------------|-------------------------------|
| Copper cents .....         | \$1,562,887.44 | \$376,314.53 | \$1,186,572.91                |
| Copper half-cents * .....  | 39,926.11      |              | 39,926.11                     |
| Copper-nickel cents .....  | 2,007,720.00   | 764,805.19   | 1,242,914.81                  |
| Bronze cents .....         | 7,351,433.35   | 40,561.13    | 7,310,872.22                  |
| Bronze 2-cent pieces ..... | 912,020.00     | 320,156.58   | 591,863.42                    |
| Nickel 3-cent pieces ..... | 905,768.52     | 233,720.92   | 672,047.60                    |
| Nickel 5-cent pieces ..... | 13,456,420.95  | 169,545.60   | 13,286,875.35                 |
| Total .....                | 26,236,176.37  | 1,905,103.95 | 24,331,072.42                 |

\* There is no record of the melting of any old copper half-cents, but it is believed that few, if any, are now in circulation.

An avoirdupois pound of 1-cent bronze blanks will coin \$1.46, and an avoirdupois pound of nickel blanks will coin \$4.43.

#### GOLD AND SILVER BARS MANUFACTURED.

During the year, in addition to the coinage executed there were manufactured by the mints and assay offices gold and silver bars of the value of \$56,315,566.71.

#### BARS MANUFACTURED, FISCAL YEAR 1894.

| Description. | Value.          |
|--------------|-----------------|
| Gold .....   | \$48,932,884.12 |
| Silver ..... | 7,382,682.59    |
| Total .....  | 56,315,566.71   |

#### DIES AND MEDALS MANUFACTURED.

The number and description of the coinage and medal dies prepared by the engraving department of the mint at Philadelphia are shown in following tables:

#### DIES MANUFACTURED, 1894.

| Description.                                     | Number. |
|--------------------------------------------------|---------|
| Gold coinage .....                               | 400     |
| Silver coinage .....                             | 424     |

| Proof coinage .....                              | 28      |
| Annual assay medal .....                         | 2       |
| Columbian award (obverse) .....                  | 1       |
| Indian peace .....                               | 1       |
| Franklin Pierce, Presidential reproduction ..... | 1       |
| Total .....                                      | 1,135   |

## REPORT ON THE FINANCES.

## MEDALS MANUFACTURED, 1894.

| Description. | Number. |
|--------------|---------|
| Gold .....   | 84      |
| Silver ..... | 382     |
| Bronze ..... | 3,916   |
| Total .....  | 4,382   |

A detailed list of the medals struck during the year appears in the Appendix (p. 266).

The number of proof sets, single proof coins, and medals sold during the year is exhibited in the following table:

## MEDALS AND PROOF COINS MANUFACTURED AND SOLD, 1894.

| Medals.                  | Number. | Value.     |
|--------------------------|---------|------------|
| Gold .....               | 87      | \$4,135.84 |
| Silver .....             | 344     | 632.07     |
| Bronze .....             | 794     | 545.32     |
| Total .....              | 1,225   | 5,313.23   |
| Proof sets:              |         |            |
| Gold .....               | 36      | 1,386.00   |
| Silver .....             | 757     | 1,892.50   |
| Minor .....              | 1,240   | 99.20      |
| Total .....              | 2,033   | 3,377.70   |
| Proof pieces:            |         |            |
| Single gold pieces ..... | 91      | 332.50     |

## GOLD BARS EXCHANGED FOR GOLD COIN.

The value of gold bars, for use in the industrial arts, exchanged for gold coin during the last fiscal year at the mint at Philadelphia and assay office at New York, was \$3,508,899.10, as shown in the following table:

## FINE GOLD BARS EXCHANGED FOR GOLD COIN, 1894

| Months.         | Philadelphia. | New York.    | Total.       |
|-----------------|---------------|--------------|--------------|
| 1893.           |               |              |              |
| July .....      | \$55,340.78   | \$180,103.19 | \$235,443.97 |
| August .....    | 25,295.61     | 108,053.75   | 133,349.36   |
| September ..... | 45,374.71     | 220,677.10   | 266,051.81   |
| October .....   | 35,128.26     | 267,899.64   | 303,027.90   |
| November .....  | 45,264.05     | 352,729.75   | 397,993.80   |
| December .....  | 25,094.46     | 160,248.91   | 185,343.37   |
| 1894.           |               |              |              |
| January .....   | 55,226.97     | 187,518.40   | 242,745.37   |
| February .....  | 55,226.18     | 296,244.07   | 351,470.25   |
| March .....     | 65,286.98     | 289,336.35   | 354,623.33   |
| April .....     | 70,305.63     | 316,742.21   | 387,047.84   |
| May .....       | 60,320.38     | 294,908.76   | 355,229.14   |
| June .....      | 70,442.14     | 226,130.82   | 296,572.96   |
| Total .....     | 608,306.15    | 2,900,592.95 | 3,508,899.10 |

## WORK OF GOVERNMENT REFINERIES.

The weight and value of gold and silver operated on in the refinery of each institution during the last fiscal year were as follows:

## BULLION RECEIVED AND OPERATED UPON IN THE GOVERNMENT REFINERIES, 1894.

| Institutions.      | Gold.            |                | Silver.          |                | Total value.   |
|--------------------|------------------|----------------|------------------|----------------|----------------|
|                    | Standard ounces. | Value.         | Standard ounces. | Value.         |                |
| Philadelphia ..... | 395,068.403      | \$7,350,109.82 | 1,052,111.42     | \$1,224,275.10 | \$8,574,384.92 |
| San Francisco ...  | 181,112.956      | 3,369,543.37   | 140,115.63       | 163,043.64     | 3,532,587.01   |
| Carson .....       | 48,739.035       | 906,772.75     | 804,534.40       | 936,185.48     | 1,842,958.23   |
| New Orleans .....  | 11,312.677       | 210,468.41     | 3,492.76         | 4,064.30       | 214,532.71     |
| New York .....     | 516,084.116      | 9,601,564.95   | 3,930,153.37     | 4,573,269.37   | 14,174,834.32  |
| Total .....        | 1,152,317.187    | 21,438,459.30  | 5,930,407.58     | 6,900,837.89   | 28,339,297.19  |

## SILVER PURCHASES.

From July 1 to November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, silver bullion was purchased by the Secretary of the Treasury under the provisions of said act. Offers for the sale of silver in lots of 10,000 ounces and over were received and considered on Mondays, Wednesdays, and Fridays of each week, and the superintendent of the mints at Philadelphia, New Orleans, San Francisco, and Carson were authorized to purchase lots of less than 10,000 ounces, at a price fixed from time to time by the Director of the Mint, with the approval of the Secretary of the Treasury, the price being determined in accordance with the prevailing market rate. The amount of silver purchased under the provisions of the act of July 14, 1890, from July 1 to November 1, 1894, aggregated 11,917,658.78 ounces fine, costing \$8,715,521.32. The average cost per ounce fine was \$0.7313, at which rate the bullion value of the silver dollar is \$0.5656.

The total amount of silver purchased under the act of July 14, 1890, from August 13, 1890, the date the act went into effect, to November 1, 1893, the date of the repeal of its purchasing clause, aggregated 168,674,682.53 ounces fine, costing \$155,931,002.25, the coining value of the same in silver dollars being \$218,084,438. Of the amount purchased there was used up to November 1, 1894, in the coinage of 38,531,143 silver dollars 29,801,430.88 ounces fine, costing \$30,767,082.97.

The amount wasted by the operative officers of the mints and sold in sweeps was 63,570.37 ounces fine, costing \$62,535.64, leaving a balance on hand November 1, 1894, of 138,809,681.28 ounces fine, costing \$125,101,383.64, the coining value of the same in silver dollars being 179,471,103, and which would give a seignorage of \$54,369,719.36.

The quantity and cost of silver purchased from July 1 to November 1, 1893, at each of the coinage mints is shown in the following tables:

DELIVERIES ON PURCHASES OF SILVER UNDER ACT OF JULY 14 1890, FROM JULY 1, TO NOVEMBER 1, 1893.

| Mints.             | Fine ounces.  | Cost.          |
|--------------------|---------------|----------------|
| Philadelphia.....  | 8,997,601.00  | \$6,581,593.83 |
| San Francisco..... | 1,231,351.70  | 901,488.47     |
| New Orleans.....   | 1,386,116.55  | 1,011,543.41   |
| Carson.....        | 302,589.53    | 220,895.61     |
| Total.....         | 11,917,658.78 | 8,715,521.32   |

BULLION DELIVERED ON SILVER PURCHASES UNDER ACT OF JULY 14, 1890, FOR THE MONTHS OF JULY, AUGUST, SEPTEMBER, OCTOBER, AND NOVEMBER, 1893.
